Maths

Unit 5 – 2D shapes.

WALT: Construct circles of a specified radius or diameter.

WALT: Construct circles of a specified radius or diameter.

I can draw a circle when given the radius in cm.

I can draw a circle when given the radius or diameter in cm.

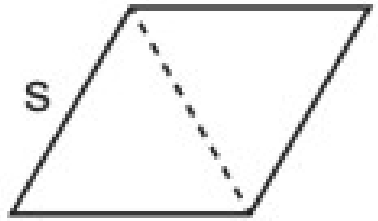

I can convert between cm and mm to draw a circle.

WALT: Construct circles of a specified radius or diameter.

Retrieval Practice

) Two **identical** equilateral triangles are joined together to make a new shape.

Draw a ring around the correct expression for the perimeter, d, of the new shape.

d = s + s + s

d = s + s + s + s

d = s + s + s + s + s

d = s + s + s + s + s + s

[1]

WALT: Construct circles of a specified radius or diameter.

Starter – Mr. Rhys draws 2 circles.

One has a **radius** of 40mm

One has a **diameter** of 8cm.

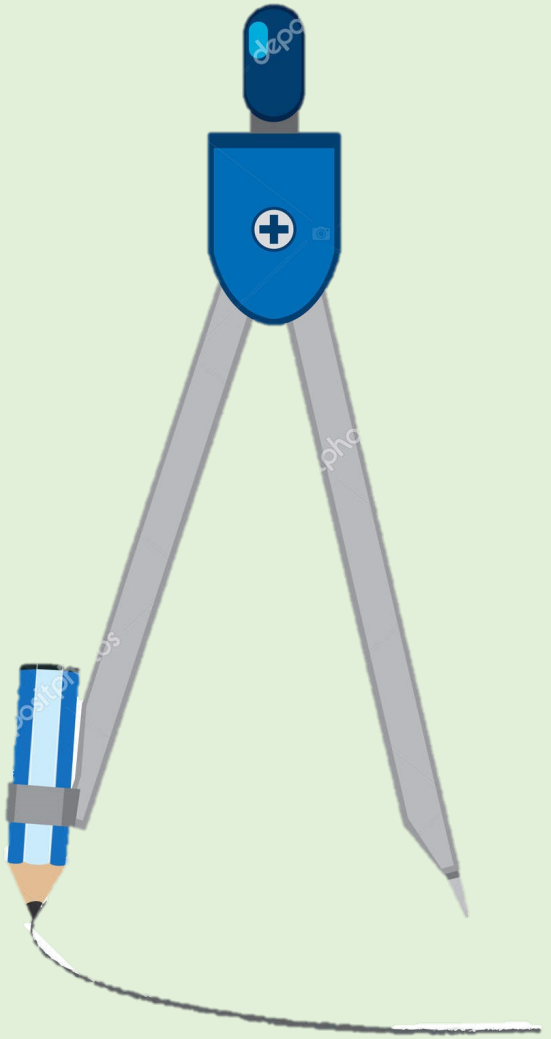

Both circles are the same size.

Which circle is bigger?

WALT: Construct circles of a specified radius or diameter.

To draw a circle accurately we need a **compass**.

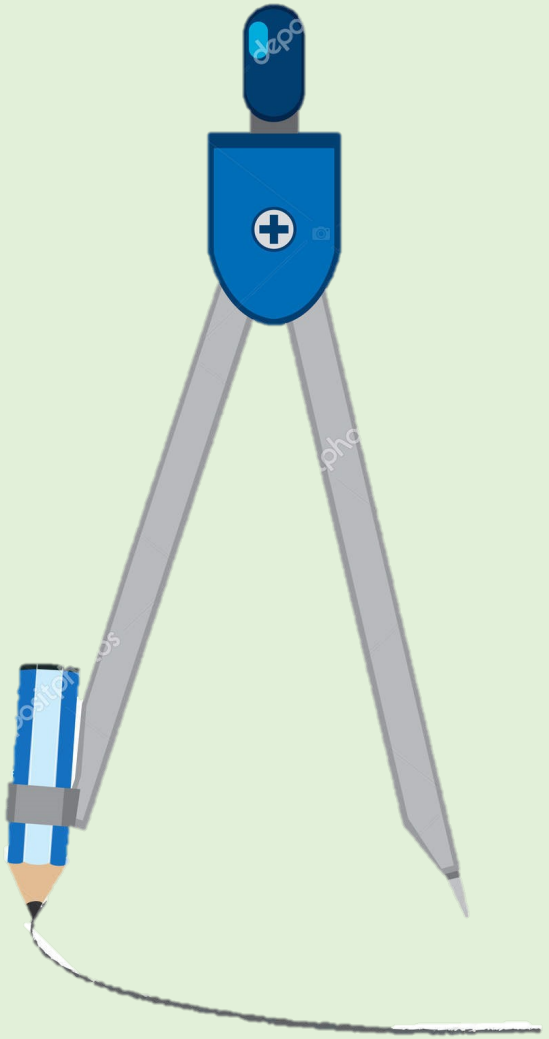

When using a compass we need to make sure that we are very careful.

WALT: Construct circles of a specified radius or diameter.

The point of the compass stays on your piece of paper.

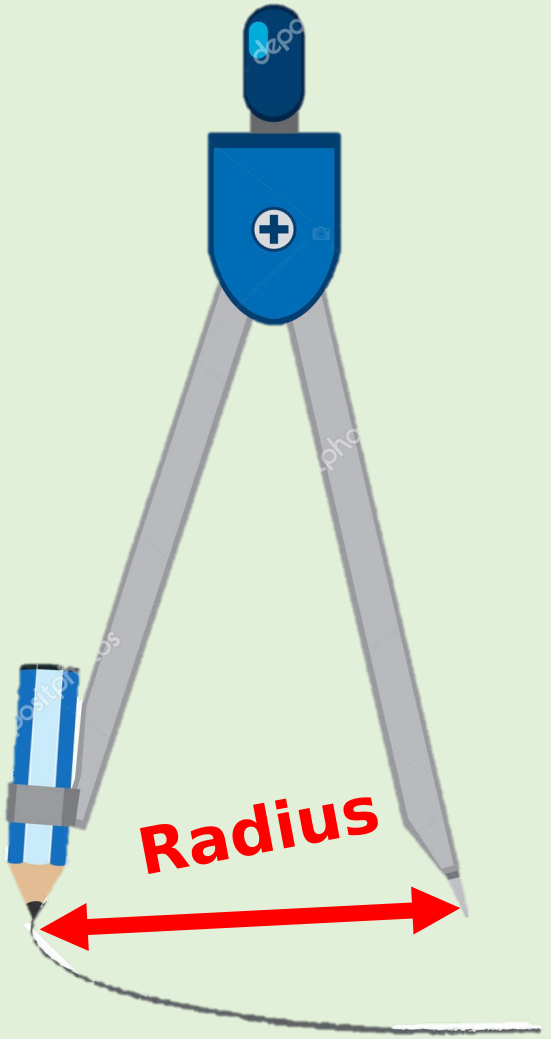

The pencil moves which creates the circle.

Have a go at drawing a circle in your notebook. Work out which way is best for you!

WALT: Construct circles of a specified radius or diameter.

The space between the point of the compass and the point of the pencil is the radius of the circle you are drawing.

WALT: Construct circles of a specified radius or diameter.

Check your understanding

a) Draw a circle with a radius of 5cm.

b) Draw a circle with a diameter of 60mm.

WALT: Construct circles of a specified radius or diameter.

Draw circles with these measurements.
Check your partner’s answers.

a) A radius of 4cm

b) A radius of 6cm

c) A diameter of 10cm

d) A diameter of 9cm

e) A radius of 60mm

f) A diameter of 90mm

WALT: Construct circles of a specified radius or diameter.

I can draw a circle when given the radius in cm.

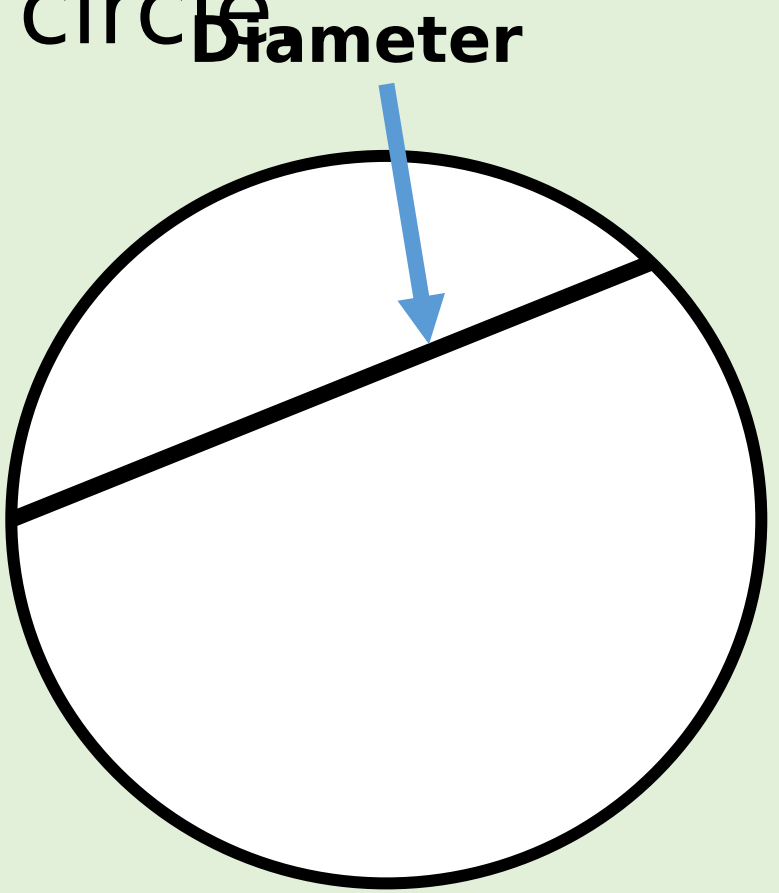

I can draw a circle when given the radius or diameter in cm.

I can convert between cm and mm to draw a circle.

WALT: Construct circles of a specified radius or diameter.

Plenary – Ms. Colette has drawn and labeled the diameter on a circle.

What mistake has she made?
