Unit 4 – Inventions

Tuesday 10th November 2026

WALT: Understand, with support, most specific information and detail in short and extended texts.

WALT: Understand, with support, most specific information and detail in short and extended texts.

I can identify the actions a Asimo can do.

I can answer true or false questions about the text correctly.

I can write my own true or false questions about the text.

WALT: Understand, with support, most specific information and detail in short and extended texts.

My name is Jane. I'm 13 years **(0)** *old* and I've got two younger brothers. I was born in Sydney, Australia, and we lived there until I was 12. Six months **(6)** **ago** my dad got a new job and my family moved to Toronto in Canada. I like our new house here more **(7)** **than** our house in Sydney but the weather isn't as hot **(8)** **as** in Australia.

I've made some new friends at school. **(9)** **They** are really nice and we spend a **(10)** **lot** of time together playing popular Canadian sports. I didn't know very **(11)** **much** about sports like ice hockey before I came here, so it has **(12)** **been** good to learn how to play.

WALT: Understand, with support, most specific information and detail in short and extended texts.

Starter – Look at these photos.

What do you think this robot can do?

WALT: Understand, with support, most specific information and detail in short and extended texts.

Read the text about Asimo

Imagine a robot that can play football, dance, hop, jump and pour you a drink! Meet Asimo, the most advanced humanoid robot in the world. Asimo can walk on two legs and move by itself using sensors inside its body. It can understand voice commands and human gestures; it recognises moving objects and it can work out the distance and direction of those objects. It is just over one metre tall and has a rechargeable battery.

Scientists at Honda, the Japanese company, started developing Asimo in the 1980s and presented it to the world in 2000. The company created Asimo to help people in need with tasks around the house. Since then, scientists and designers have upgraded Asimo's technology, so it has more and more skills and abilities.

Asimo has become a worldwide celebrity and it has demonstrated its skills at science fairs and on TV shows all over the world! In 2005, Mickey Mouse welcomed Asimo at Disneyland. In 2011, it appeared on a TV quiz show in the UK, surprising everyone by dancing and pouring the presenter a drink; in 2014, it played football with the former US president, Barack Obama. It has even received royal welcomes in Dubai and the UK.

In 2018, Honda stopped producing the robot in its current form, but the company is continuing to use Asimo's technology to help people who need it most. Watch this space!

Charades

With your partner take it in turns to mime the actions that Asimo can do.

Guess which action your partner is acting.

WALT: Understand, with support, most specific information and detail in short and extended texts.

Read the text again. Decide if these sentences are true or false.
Correct the false sentences.

a Most people knew about Asimo in the 1980s. **False**

b Scientists created Asimo to do jobs for people with illnesses or disabilities. **True**

c Asimo's technology was the same in 2014 as it was in 2000. **False**

d In 2005, Asimo visited a famous theme park. **True**

e Honda are still making Asimo robots. **False**

Write your own true or false questions about the text.

Plenary – How do you think robots will progress in the future?

Do you think there will be a time where we can’t tell robots / androids from humans?
Should they have the same rights as humans?
