End of Semester 1 Math's Exam

Units covered:

GRADE 5

Unit 1	The number system
Unit 2	Numbers and sequences
Unit 4	Addition and subtraction (1)
Unit 6	Fractions and percentages
Unit 8	Addition and subtraction (2)
Unit 3	Averages
Unit 5	2D shapes

Learning Objectives

Here are the learning objectives for each unit that will be on the EOS examination.

Unit 1 – The number system

6Np.01 Understand and explain the value of each digit in decimals, including tenths, hundredths and thousandths.

6Np.02 Use knowledge of place value to multiply and divide whole numbers and decimals by 10, 100 and 1,000.

6Np.03 Compose, decompose and regroup numbers, including decimals with tenths, hundredths and thousandths.

6Np.04 Round numbers with two decimal places to the nearest tenth or whole number.

Unit 2 – Numbers and sequences

6Nc.01 Count forwards and backwards in steps of a constant size, including fractions and decimals, and extend beyond zero to include negative numbers.

6Nc.03 Use the relationship between repeated addition of a constant and multiplication to find and use a position-to-term rule.

6Nc.04 Use knowledge of square numbers to generate terms in a sequence from their positions.

6Ni.08 Use knowledge of multiplication and square numbers to recognise cube numbers from 1 to 125.

6Ni.06 Understand common multiples and common factors.

Unit 4 – Addition and subtraction (1)

6Ni.01 Estimate, add and subtract integers.

6Nc.02 Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Unit 6 – Fractions and percentages

6Nf.01 Understand that a fraction can be represented as division of the numerator by the denominator, including proper and improper fractions.

6Nf.02 Understand that proper and improper fractions can act as operators.

6Nf.07 Recognise percentages—1% and multiples of 5% up to 100%—of shapes and whole numbers.

6Nf.03 Use knowledge of equivalence to write fractions in their simplest form.

6Nf.04 Recognise that fractions, decimals with one or two decimal places and percentages can have equivalent values.

6Nf.08 Understand the relative size of quantities to compare and order numbers with one or two decimal places, proper fractions with different denominators and percentages using the symbols =, > and <.

Unit 8 – Addition and subtraction (2)

6Np.03 Compose, decompose and regroup numbers, including decimals with tenths, hundredths and thousandths.

6Nf.09 Estimate, add and subtract numbers with the same or different numbers of decimal places.

6Nf.05 Estimate, add and subtract fractions with different denominators.

Unit 3 – Averages

6Ss.03 Understand that the mode, median, mean and range are ways to describe and summarise data sets. Find and interpret the mode, including bimodal data, median, mean and range, and consider their appropriateness for the context.

Unit 5 – 2D shapes

6Gg.01 Identify, describe, classify and sketch quadrilaterals, including reference to angles, symmetrical properties, parallel sides and diagonals.

6Gg.02 Know the parts of a circle: centre, radius, diameter and circumference.

6Gg.11 Construct circles of a specified radius or diameter.

6Gg.08 Identify rotational symmetry in familiar shapes, patterns or images with a maximum order of 4. Describe rotational symmetry as “order x”.
