

Maths

**Unit 6 - Fractions
and Percentages.**

WALT:

6Nf.07: Recognise percentages of shapes and whole numbers.

WALT: Recognise percentages of shapes and whole numbers.

**With support, I
can find
percentages of
amounts.**

**Independently,
I can find
percentages
of amounts.**

**I can create my
own
percentage
bingo card.**

WALT: Recognise percentages of shapes and whole numbers.

Retrieval Practice

Last Lesson What is $\frac{5}{12}$ of \$48?	Last Week Answer these questions: a) $7 - 12 =$ b) $-4 + 5 =$ c) $-9 - (-3) =$
Last Unit The symbols $\square$ and $\triangle$ each represent a different whole number. $\square \times \triangle = 2100$ $\square + \square + \triangle = 130$ Write what number each symbol represents. $\square = \dots\dots\dots$ $\triangle = \dots\dots\dots$ [1]	Last Year Focus 1 Write the coordinates that are inside the circle on the grid. (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>) (<u> </u>, <u> </u>)

WALT: Recognise percentages of shapes and whole numbers.

Starter – Discuss with your partner

How do we find 10% of a number?

How do we find 20%?

How do we find 1%

WALT: Recognise percentages of shapes and whole numbers.

What is percentage?

Percent means out of 100.

When we talk about percent, we mean “how many parts out of 100?”

WALT: Recognise percentages of shapes and whole numbers.

Just like fractions we can use percentages as operators.

How could we find 40% of 600?

To find 10% we divide 600 by 10.

60

To find 40% we multiply 60 by 4.

240

240

WALT: Recognise percentages of shapes and whole numbers.

Just like fractions we can use percentages as operators.

How could we find 4% of 600?

To find 1% we divide 600 by 100. 6

To find 4% we multiply 6 by 4. 24

24

WALT: Recognise percentages of shapes and whole numbers.

We can also calculate the percentages of shapes.

What percentage of this shape is shaded?

As a fraction $\frac{3}{10}$ is shaded.

$$\frac{3}{10} = \frac{30}{100}$$

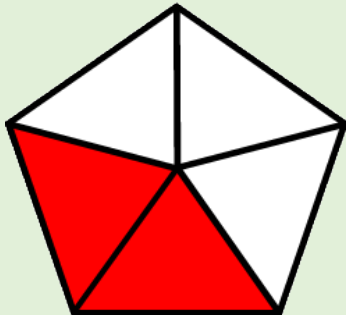

$$\frac{30}{100} = 30\%$$

WALT: Recognise percentages of shapes and whole numbers.

Check your understanding

1. What is 70% of 350?

2. What percentage of this shape is shaded?

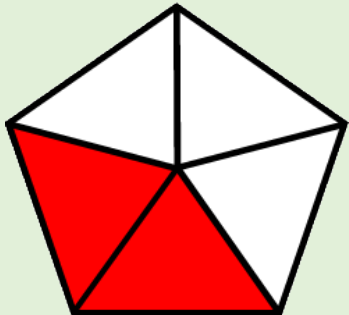

WALT: Recognise percentages of shapes and whole numbers.

Check your understanding

1. What is 70% of 350?

245

2. What percentage of this shape is shaded?

40%

WALT: Recognise percentages of shapes and whole numbers.

Percentage Bingo

Choose 9 of these percentage amounts and write them in the 3 X 3 grid.

50% of 60	25% of 200	30% of 340	10% of 50
40% of 60	20% of 20	80% of 1,000	90% of 700
75% of 500	60% of 320	1% of 3,200	5% of 300
50% of 90	10% of 80	2% of 300	20% of 540
40% of 700	30% of 300	10% of 740	80% of 30
60% of 60	20% of 670	70% of 70	50% of 680

WALT: Recognise percentages of shapes and whole numbers.

Percentage Bingo

50% of 60	25% of 200	30% of 340	10% of 50
40% of 60	20% of 20	80% of 1,000	90% of 700
75% of 500	60% of 320	1% of 3,200	5% of 300
50% of 90	10% of 80	2% of 300	20% of 540
40% of 700	30% of 300	10% of 740	80% of 30
60% of 60	20% of 670	70% of 70	50% of 680

I'm going to read the answers. You need to cross off the question that gives that answer if you have it.

If you get a row or column shout "Bingo!".

If you get all 9 squares shout "Full House!"

WALT: Recognise percentages of shapes and whole numbers.

Now you have a choice

1. Play bingo again with me
2. Create your own bingo game with questions **and** answers.

WALT: Recognise percentages of shapes and whole numbers.

**With support, I
can find
percentages of
amounts.**

**Independently,
I can find
percentages
of amounts.**

**I can create my
own
percentage
bingo card.**

WALT: Recognise percentages of shapes and whole numbers.

Plenary – Ms. Alice says “To find 34% of 600 I should divide 600 by 34.” Is she correct? Explain your answer.
