

Maths

Unit 4 - Addition and
Subtraction

17.09.2026

WALT:

6Nc.02 – Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Maths

Unit 4 - Addition and
Subtraction

**Maths - Workbook - Pages 50 -
54**

ESL - Workbook pages 20 - 23

Due - Thursday 24th September

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

I can find the value of letters in number sentences.

I can complete tables using letters that are represented by numbers.

I can write number sentences linking numbers and letters.

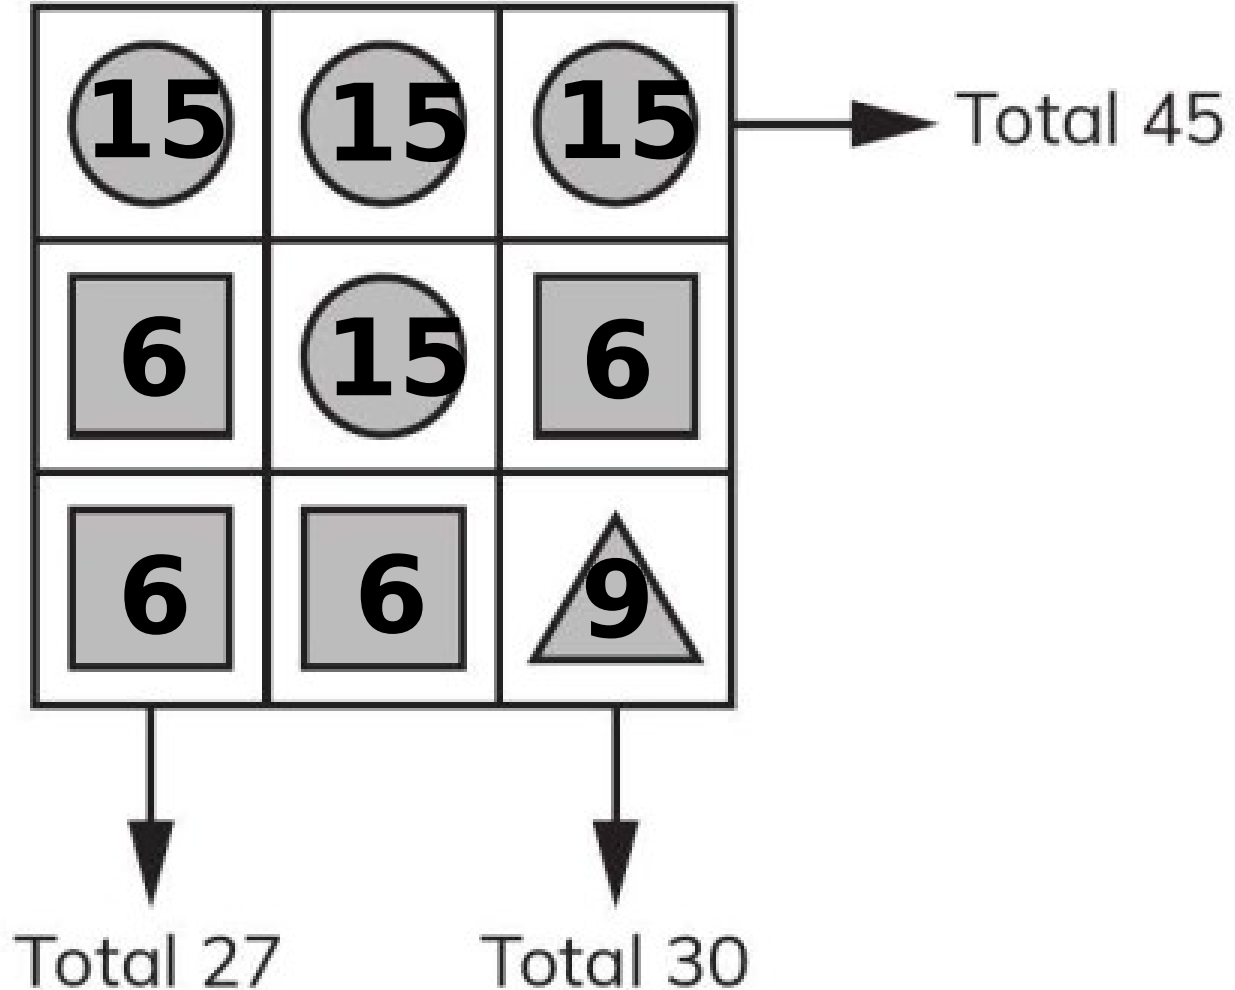

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

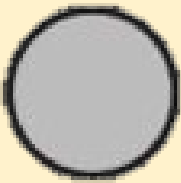

Retrieval Practice

Last Lesson Answer the following questions: a) $-4 + (-3) =$ b) $10 - (-5) =$ c) $-30 + 50 =$	Last Week The temperature at midnight is -8°C. At midday it rises by 15°C. What is the temperature at midday?
Last Unit Here is a sequence: $-0.3, -0.65, -1, -1.35\dots$ What are the next 3 terms?	Last Year What is mode for each of these sets of data? a 1, 1, 1, 2, 3 b 30, 29, 31, 29, 32 c 8, 9, 9, 8, 9, 8, 9 d $1\frac{1}{2}, 1\frac{1}{4}, 1\frac{1}{2}, 1\frac{3}{4}, 1\frac{3}{4}, 1\frac{3}{4}$

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Starter – Solve this puzzle

 = **15**

 = **6**

 = **9**

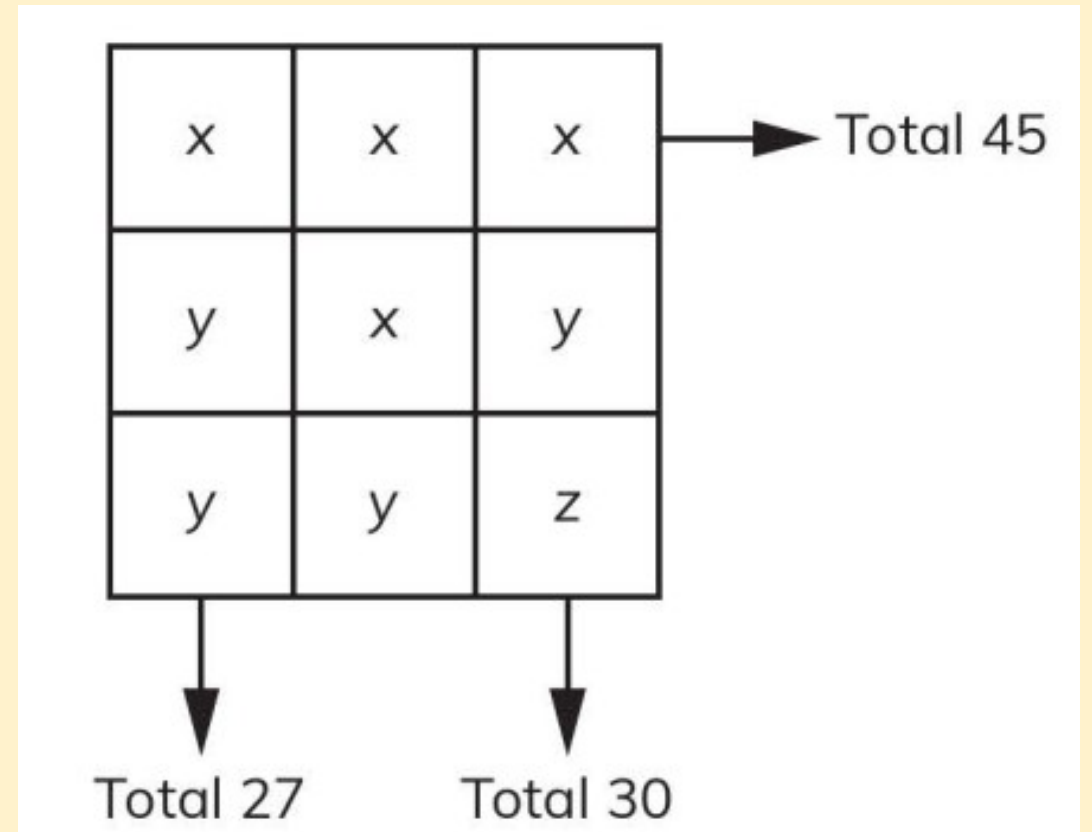

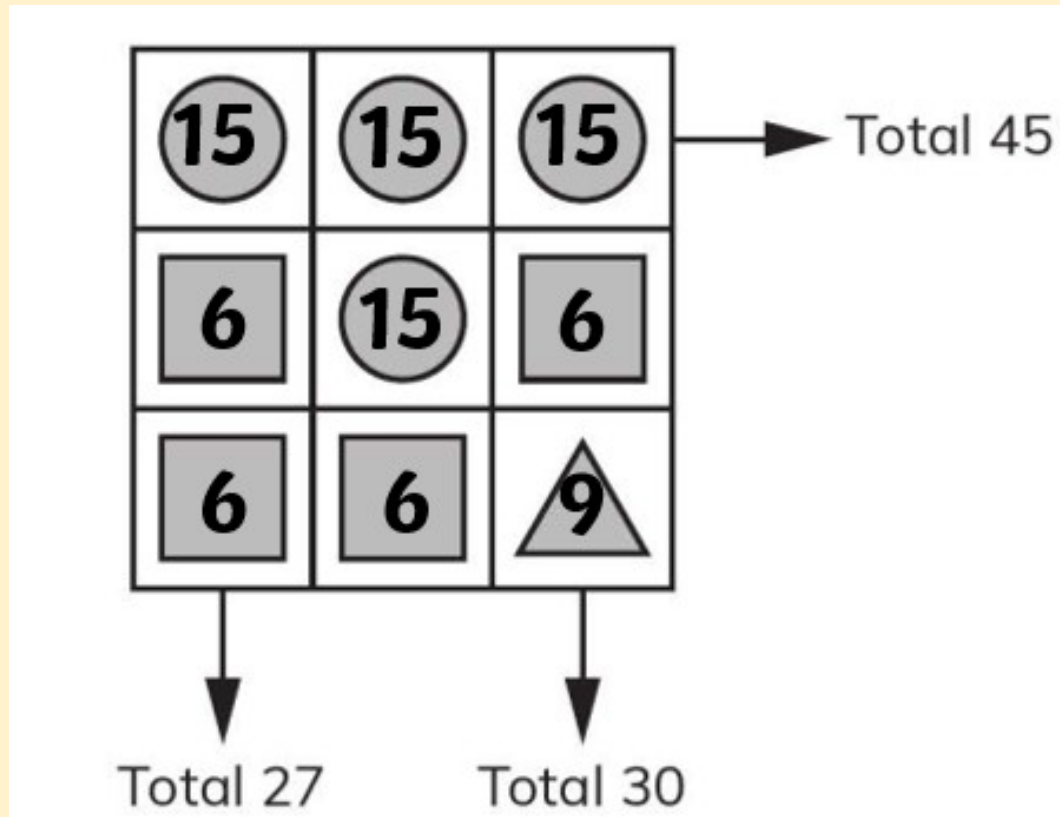

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

In the starter we just saw that we can represent numbers as shapes.

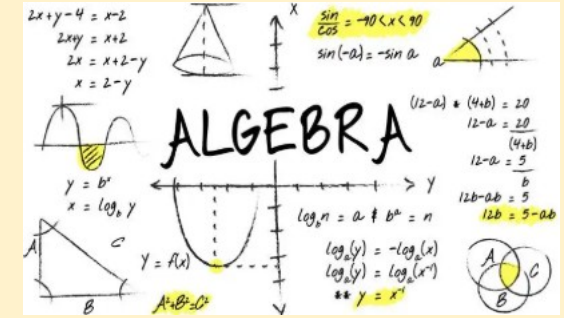

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

We can do the same with letters.

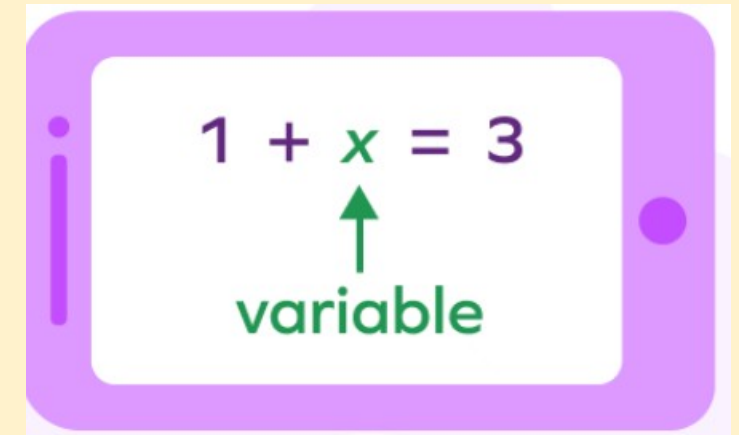

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

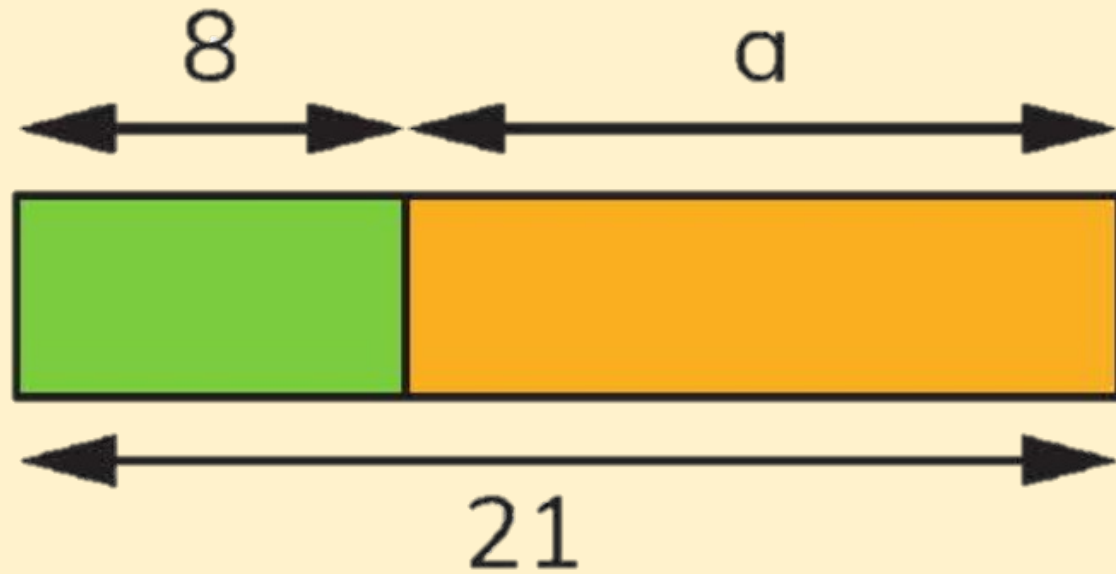

This is known as **algebra**!

Algebra is a branch of mathematics that uses letters and symbols to represent unknown numbers and describe rules or relationships between them

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

$$a = 13$$

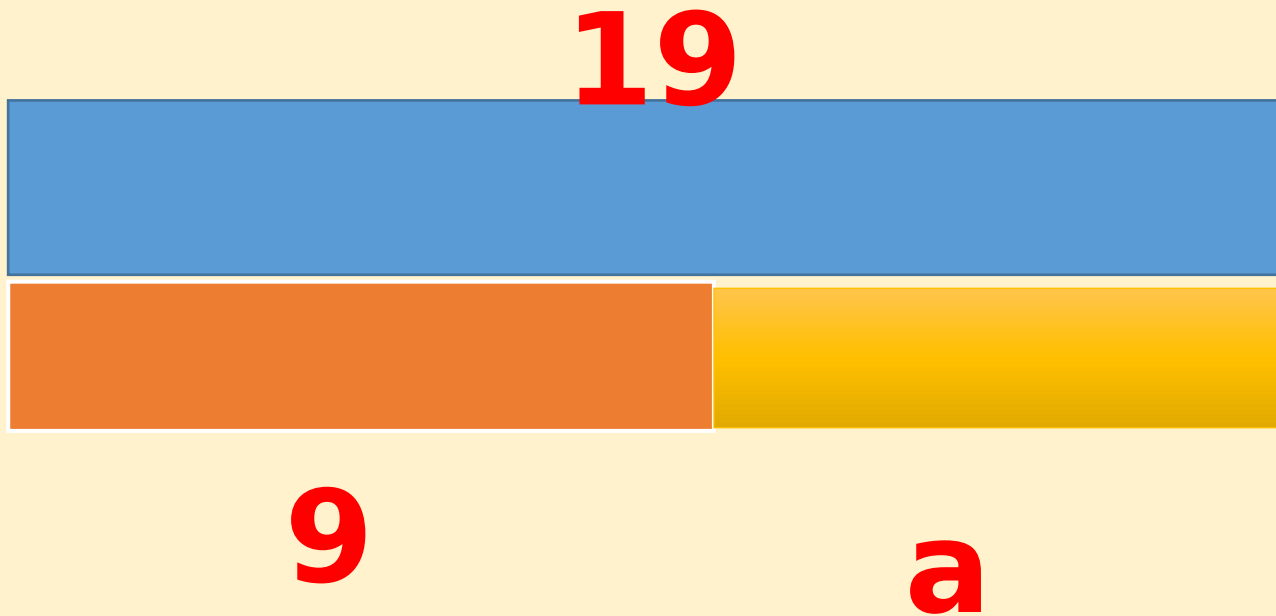

Write a number sentence linking 8, a and 21.

Can you write more than one?

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Check your understanding

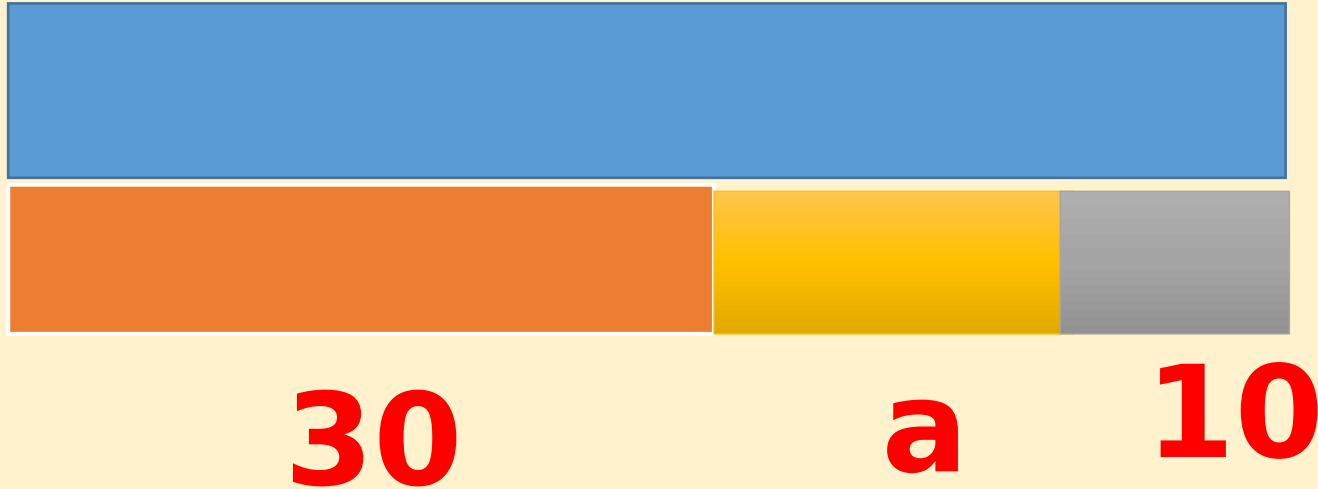

Write a number sentence linking 19, a and 9.

Can you write more than one?

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Check your understanding

54

Write a number sentence linking 54, a and 10.

Can you write more than one?

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Mr. Jon and Ms. Colette have 10 pairs of shoes in total.

The number of pairs of shoes Mr. Jon has is J. The number of pairs of shoes Ms. Colette has is C.

J	5	2	6	3
C	5	8	4	7

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Check your understanding

Mr. David always has 5 more computer mice than Mr. Josh.

The number of computer mice Mr. David has is D. The number that Mr. Josh has is J.

Copy and complete this table.

D	7	9	11	14
J	2	4	6	9

Write a number sentence linking D, J and 5.

Can you write more than one?

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Find the numerical value of the letter.

a) $7 + v = 10$

$v =$

b) $34 - p = 24$

$p =$

c) $y - 45 = 12$

$y =$

d) $g + g + g = 18$

$g =$

e) Chelsea have 1 more Champions League trophies than Manchester City and 2 more than Arsenal.

Complete the table where C represents the amount of Champions League trophies Chelsea have, M represents the number Manchester City have and A represents the number Arsenal have

C	2			
M		8		4
A			5	

f) Write some number sentences that link C , M , A , 2 and 1.

Example: $M + 1 = C$

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Find the numerical value of the letter.

a) $7 + v = 10$

$v = 3$

b) $34 - p = 24$

$p = 10$

c) $y - 45 = 12$

$y = 57$

d) $g + g + g = 18$

$g = 6$

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

e) Chelsea have 1 more Champions League trophies than Manchester City and 2 more than Arsenal.

Complete the table where C represents the amount of Champions League trophies Chelsea have, M represents the number Manchester City have and A represents the number Arsenal have

C	2	9	7	5
M	1	8	6	4
A	0	7	5	3

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

f) Write some number sentences that link C , M , A , 2 and 1.

Example: $M + 1 = C$

$$A + 2 = C$$

$$A + 1 = M$$

$$M - A = 1$$

$$C - A = 2$$

$$C - M = 1$$

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

I can find the value of letters in number sentences.

I can complete tables using letters that are represented by numbers.

I can write number sentences linking numbers and letters.

WALT: Recognise the use of letters to represent quantities that vary in addition and subtraction calculations.

Plenary – Which of these sentences are true and which is false?

$$j + 6 = 6 + j$$

$$j - 6 = 6 - j$$
