

# Maths

Unit 4 - Addition  
and Subtraction

**WALT:**

**6Ni.01** – To estimate, add and subtract integers.

**WALT:** To estimate, add and subtract integers.

**With support, I  
can estimate,  
calculate and  
check addition  
questions.**

**Independently, I  
can estimate,  
calculate and  
check addition  
questions.**

**I can write an  
explanation that  
convinces someone  
estimating and  
checking are  
important.**

**WALT:** To estimate, add and subtract integers.

## Retrieval Practice

5,639,728

Which digit is in the **hundred thousands** place?

What is **two thousand more** than 5,639,728?

**WALT:** To estimate, add and subtract integers.

**Starter** – Sort these numbers **0**

|            | Integer      | Not an integer |                      |
|------------|--------------|----------------|----------------------|
| <b>-8</b>  |              |                | <b>2 1/2</b>         |
| <b>5.6</b> |              |                | <b>4<sup>2</sup></b> |
| <b>7</b>   |              |                |                      |
| <b>1/4</b> |              |                |                      |
|            | <b>3,587</b> |                | <b>17</b>            |

**WALT:** To estimate, add and subtract integers.

Add together these numbers.

Girls use a calculator

Boys don't use a  
calculator

**WALT:** To estimate, add and subtract integers.

Did you all get the  
same answer?

What does this show  
us we need to do  
before we add large  
numbers together?

**WALT:** To estimate, add and subtract integers.

What was quicker, using the calculator or the written method?

Which provided the most accurate results?

Does using a calculator always give the right answer?

**WALT:** To estimate, add and subtract integers.

Even when using a calculator you must:

- **Estimate your answer first.**
- **Check your answer.**

**WALT:** To estimate, add and subtract integers.

Checking an answer means you **do the question again**. If you can it is a good idea to use a different method.

If the answer is not the same you need to do the question a third time to see which answer is correct.

Checking is **not** just looking at the answer.

**WALT:** To estimate, add and subtract integers.

# Check your understanding.

Add together this list of numbers.

Make sure you:

1. Estimate
2. Calculate
3. Check

Ms. Anh says estimating and checking are a waste of time.

Write an explanation that **convinces** her that they are important and useful.

**WALT:** To estimate, add and subtract integers.

**With support, I  
can estimate,  
calculate and  
check addition  
questions.**

**Independently, I  
can estimate,  
calculate and  
check addition  
questions.**

**I can write an  
explanation that  
convinces someone  
estimating and  
checking are  
important.**
