

Maths

Unit 1.1 - Place
Value

18.08.2026

WALT: Understand and explain the value of each digit in decimals.

WALT: Understand and explain the value of each digit in decimals.

I can read numbers correctly to three decimal places.

I can identify the value of digits in a number correctly to three decimal places.

I can find and correct the mistakes in the work of others.

Homework

Complete pages 9 – 13 in your Workbooks.

Due – Tuesday 25th August 2026.

WALT: Understand and explain the value of each digit in decimals.

Retrieval Practice -

Talk to your partner.

What did you learn to do in maths in grade 4?

What did you find the most challenging?

Now swap

WALT: Understand and explain the value of each digit in decimals.

Starter -

What does these words mean?

Decimal

Decimal point

Decimal place

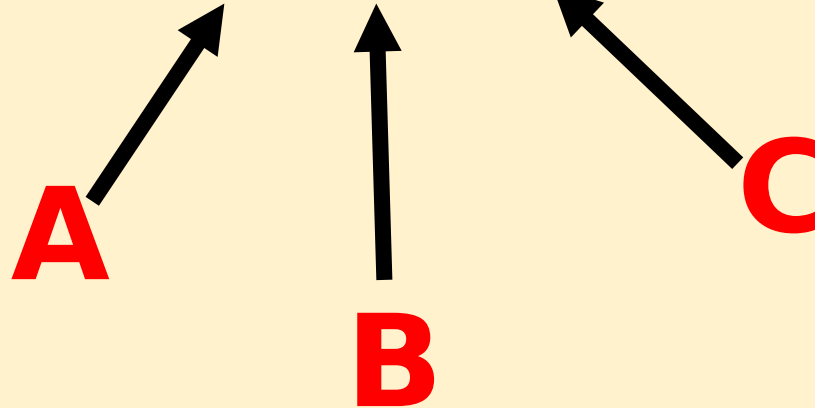

Place value

WALT: Understand and explain the value of each digit in decimals.

How would you say this number?

5,972.593

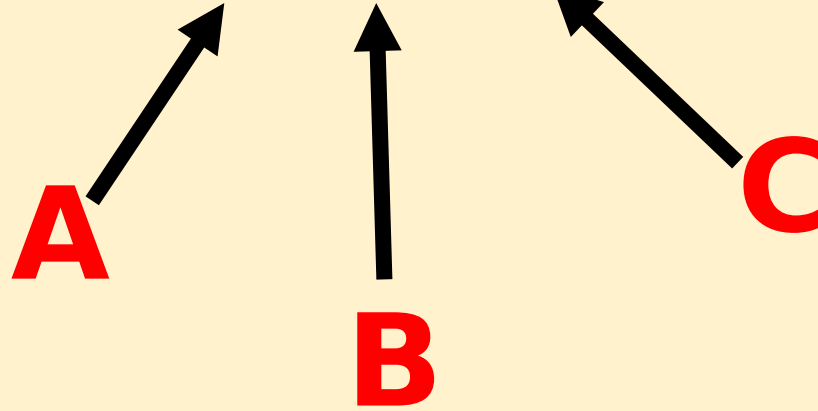

What is the **value** of each of these digits?

WALT: Understand and explain the value of each digit in decimals.

5,972.593

What is the **value** of each of these digits?

A = 5 tenths

B = 9 hundredths

**C = 3
thousandths**

WALT: Understand and explain the value of each digit in decimals.

89,324.328

What is the **value** of each digit after the decimal point?

3 tenths 0.3

2 hundredths

8 thousandths

0.008

WALT: Understand and explain the value of each digit in decimals.

713.043

What is the **place value** of the 4?

hundredths

WALT: Understand and explain the value of each digit in decimals.

Take it in turns to read the following numbers to your partner.

a) 56,327.56

b) 345.639

c) 12.502

d) 813,593.008

e) 437.170

Write the value of the underlined digit in each of the following numbers.

f) 56,327.56

g) 345.639

h) 12.502

i) 813,593.008

j) 437.170

k) Ms. Colette reads the number 17.539 out loud. She says:

“The number is seventeen point five-hundred and nine. The three is worth hundredths.”

Is she correct?

What mistake(s) has she made?

WALT: Understand and explain the value of each digit in decimals.

Take it in turns to read the following numbers to your partner.

a) 56,327.56

b) 345.639

c) 12.502

d) 813,593.008

e) 437.170

WALT: Understand and explain the value of each digit in decimals.

Write the value of the bold digit in each of the following numbers.

f) 56,327.5**6** **6 hundredths** **0.06**

g) 345.**6**39 **6 tenths** **0.6**
