

Maths

Unit 6 - Fractions and Percentages.

29.09.2026

WALT:

6Nf.04 Recognise that fractions, decimals and percentages can have equivalent values.

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

I can find the fraction, decimal and percentage of a 100 square that is shaded.

I can convert between fractions, decimals and percentages.

I can order a mix of fractions, decimals and percentages.

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Look at this expression.

$$y + 4$$

Retrieval Practice

Tick the value for y that gives a **prime** number value for $y + 4$

$$y = 8$$

$$y = 9$$

$$y = 10$$

Tick the value for y that gives a **square** number value for $y + 4$

$$y = 5$$

$$y = 6$$

$$y = 7$$

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Starter - Which is the odd one out?

$$50\% \text{ of } 100 =$$

$$\frac{1}{2} \text{ of } 100 =$$

$$100 \times 0.5 =$$

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

When we learnt about percentages, we learnt that a % can be expressed as a fraction with a denominator of 100.

$$\text{E.g. } 50\% = \frac{50}{100}$$

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Last lesson, we learnt how to simplify fractions.

• What is $\frac{50}{100}$ in its simplest form?

$\frac{1}{2}$

Therefore $50\% = \frac{1}{2}$

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Decimals can also be equivalent to fractions and percentages.

If we write one whole to 2 decimal places, what does it look like?

1.00

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Decimals can also be equivalent to fractions and percentages.

What decimal is equivalent to 50% and $\frac{1}{2}$? How do you know?

0.5

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

We can see the equivalence more clearly when we look on a square divided into 100 parts.

We can see that 50 out of 100 squares are shaded.

This is 50%

It is also fifty one hundredths (0.50 / 0.5)

It is also $\frac{50}{100}$ (simplified $\frac{1}{2}$)

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

We can also order fractions, percentages and decimals together.

But first, we need to make them all the same type of representation.

$$\frac{6}{20}$$

1.59

0.08

150%

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Check Your Understanding

Copy and complete this table.
Write the fraction in it's simplest form.

1)

What fraction, percentage and decimal of this square has been shaded?

2)

Fraction	Percentage	Decimal
$\frac{1}{4}$		
		0.4

3) Put these values in order from smallest to greatest.

$$\frac{4}{5}$$

0.79 0.9 81%

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Check Your Understanding

1)

What fraction, percentage and decimal of this square has been shaded?

$\frac{34}{100}$ $\frac{17}{50}$ **34%** **0.34**

2)

Copy and complete this table.
Write the fraction in it's simplest form.

Fraction	Percentage	Decimal
$\frac{1}{4}$	25%	0.25
$\frac{2}{5}$	40%	0.4

3) Put these values in order from smallest to greatest.

$\frac{4}{5}$ 0.79 0.9 81%

0.79 $\frac{4}{5}$ **81%** **0.9**

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Starter

1)

What fraction, percentage and decimal of this pentagon has been shaded?

$\frac{7}{10}$ **70%** **0.7**

3) Put these values in order from smallest to greatest.

$\frac{1}{10}$ 0.03 45%

2) Copy and complete this table.
Write the fraction in it's simplest form.

Fraction	Percentage	Decimal
$\frac{1}{5}$	20%	0.2
$\frac{9}{5}$	180%	1.8

0.03 $\frac{1}{10}$ **45%**

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Write the fraction, decimal and percentage that each of these squares is shaded.

a)

b)

c)

Fraction	Decimal	Percentage

Fraction	Decimal	Percentage

Fraction	Decimal	Percentage

Complete this table to show equivalent values. Write your fractions in the simplest form.

Fraction	Decimal	Percentage
$\frac{3}{4}$		
	0.89	
$\frac{6}{5}$		
		4%

Put these values in order from smallest to greatest.

a) $\frac{2}{5}$ 0.25 20% $\frac{21}{50}$ 0.3

b) $\frac{2}{10}$ 0.45 90% $\frac{41}{50}$ 0.3

Finished everything?

Write your own question that assesses today's learning objective.

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Write the fraction, decimal and percentage that each of these squares is shaded.

a)

Fraction	Decimal	Percentage
$\frac{25}{100}$	0.25	25%

$\frac{1}{4}$

b)

Fraction	Decimal	Percentage
$\frac{70}{100}$	0.7	70%

$\frac{7}{10}$

c)

Fraction	Decimal	Percentage
$\frac{60}{100}$	0.6	60%

$\frac{3}{5}$

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Complete this table to show equivalent values. Write your fractions in the simplest form.

Fraction	Decimal	Percentage
$\frac{3}{4}$	0.75	75%
$\frac{89}{100}$	0.89	89%
$\frac{6}{5}$	1.2	120%
$\frac{1}{25}$	0.04	4%

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Put these values in order from smallest to greatest.

a)

$$\frac{2}{5}$$

0.25

20%

$$\frac{21}{50}$$

0.3

20% 0.25 0.3 $\frac{2}{5}$ $\frac{21}{50}$

b)

$$\frac{2}{10}$$

0.45

90%

$$\frac{41}{50}$$

0.3

$$\frac{2}{10}$$

90%

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

I can find the fraction, decimal and percentage of a 100 square that is shaded.

I can convert between fractions, decimals and percentages.

I can order a mix of fractions, decimals and percentages.

WALT: Recognise that fractions, decimals and percentages can have equivalent values.

Plenary

• Mr. Rhys says, " $\frac{3}{5}$ is greater than 0.35."

Explain why Mr. Rhys is correct.
