WALT: Understand that the mode, median, mean and range are ways to describe and summarise data sets.

Match the words to their definitions.

Mode	Add up all the numbers in a group and divide by the total number of numbers.
Median	The difference between the largest and smallest value in a data set.
Mean	The number that appears most often in a group of numbers.
Range	The middle number in a group of numbers when they are arranged in order from smallest to largest.

IN YOUR OWN WORDS, write a definition for each of the three averages and the range.

The mode is
The median is
The mean is
The range is

Correct the mistakes in the sentences below.

The mean is all the numbers added up and doubled.	
The range is a type of average.	
There can only be one mode.	
If the data set has an even number of values there will be 2 medians.	

Match the words to their definitions.
