English

Unit 3 – Living Things

Tuesday 3rd November 2026

WALT: Create an infographic about an animal.

WALT: Create an infographic about an animal.

I can create an infographic about an animal.

I can write about how my animal can survive.

I can include Wh-questions and relative clauses.

WALT: Create an infographic about an animal.

Retrieval Practice

Tigers in the Wild

Read the text below and think of the word which best fits each gap. Use **only one word** in each gap.

Tigers **(0)** .....*are*..... the largest members of the cat family.

Unlike many other cats, tigers love water and often swim in lakes and rivers to cool **(15)** ..... down on hot days.

Today, wild tigers **(16)** ..... protected in national parks because they are in danger of extinction.

Scientists often follow mother tigers **(17)** ..... cubs are learning how to hunt for food.

There are still many interesting questions about these big cats. For example, how **(18)** ..... a tiger see so well in the dark?

WALT: Create an infographic about an animal.

Starter – Get your research out about your type of animal.

Tell your partner how they are able to survive.

WALT: Create an infographic about an animal.

Today you will create an infographic about an animal.

What is an infographic?

An infographic is a colourful picture or poster that uses drawings, icons, maps, and charts to explain a big idea or a lot of facts in a quick and easy way.

WALT: Create an infographic about an animal.

WHAT IS AN AMPHIBIAN?

Present simple

Amphibians are animals that can live in water and on land. They need a moist environment to survive. Their habitats are near water or in wet places.

Key words

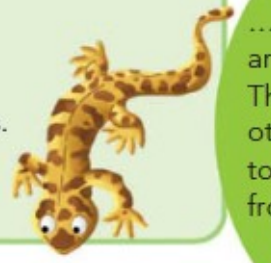

Defining relative clause

Characteristics

Amphibians are **vertebrates**, which means they have a spine or back bone.

They have a smooth, thin skin, that feels moist and sticky.

Most amphibians have lungs and gills. Most can breathe and absorb water through their skin too.

Did you know...

... that the most toxic amphibians are very brightly coloured? Their colours warn other animals to stay away from them!

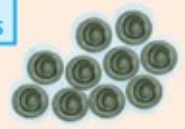

Types of amphibians

There are over 8,000 species of amphibians, including frogs, toads, salamanders and newts.

short sentences

Amphibians lay their eggs in water. Their eggs are covered in a gel, not a shell.

The young developing amphibians must protect and feed themselves in the water.

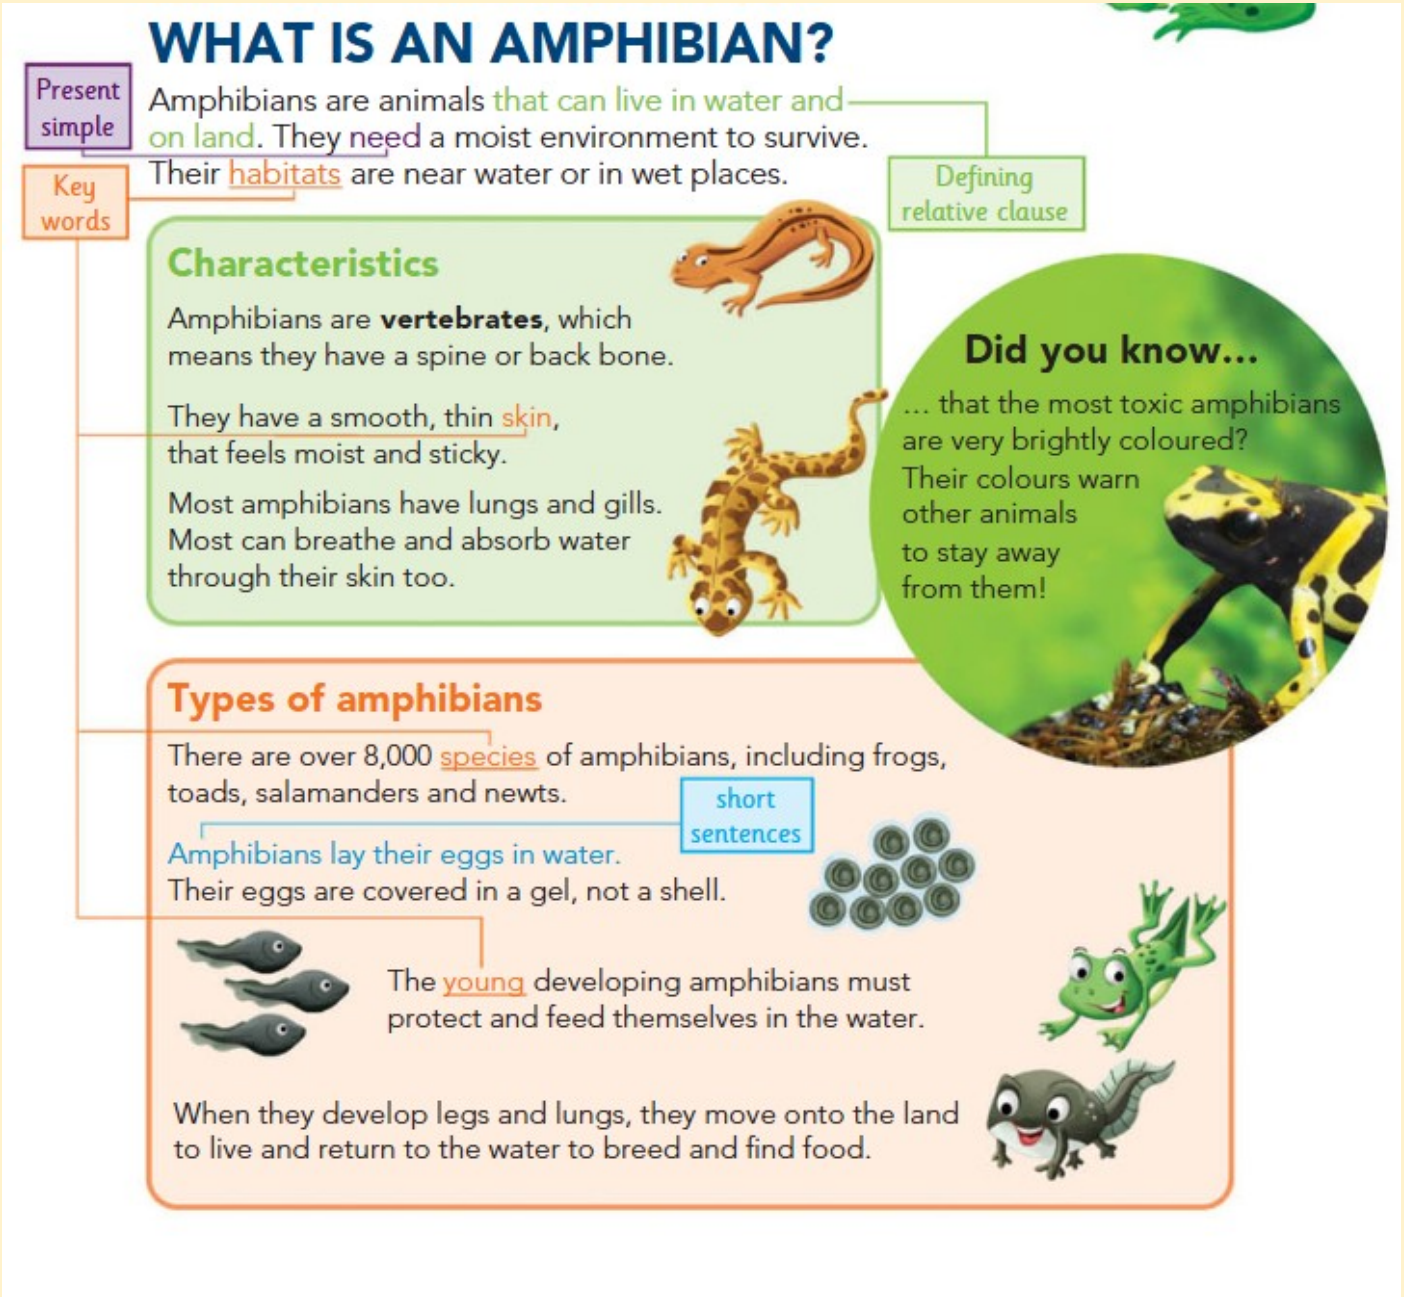

When they develop legs and lungs, they move onto the land to live and return to the water to breed and find food.

WALT: Create an infographic about an animal.

Your infographic needs to be informative about how your animal survives.

WALT: Create an infographic about an animal

HOW BIRDS SURVIVE!

WHAT SPECIAL BEAKS HELP FIND FOOD?

Birds whose beaks are different can find diverse foods. This beak helps to catch small things.

WHERE DO BIRDS BUILD SAFE HOMES?

Many birds build nests in trees or on cliffs. Mother birds who find good spots keep their eggs safe.

WHAT DO FEATHERS DO TO HELP THEM?

Fluffy feathers keep them warm in cold weather. Feathers whose surface is waterproof keep them dry.

WHY DO SOME BIRDS FLY LONG DISTANCES?

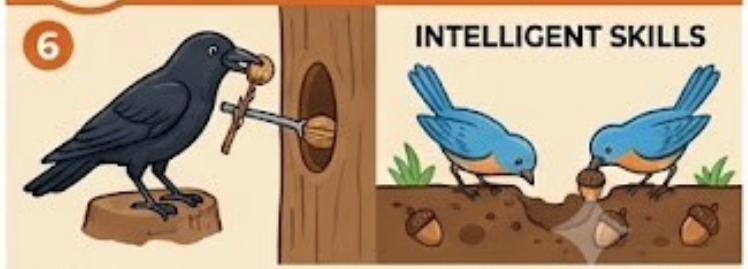

Birds fly to warmer places when it is cold. It is for birds whom a long journey gives a better chance to survive.

HOW DO BIRDS TALK TO EACH OTHER?

Birds sing to make partners. Birds whose calls are very loud warn others of a nearby dangerous animal.

WHAT SMART TRICKS DO THEY USE?

Crows are very clever and use tools to get food. A clever bird who remembers where it hides food can eat it later.

Created for Grade 6 ESL B1 Learners

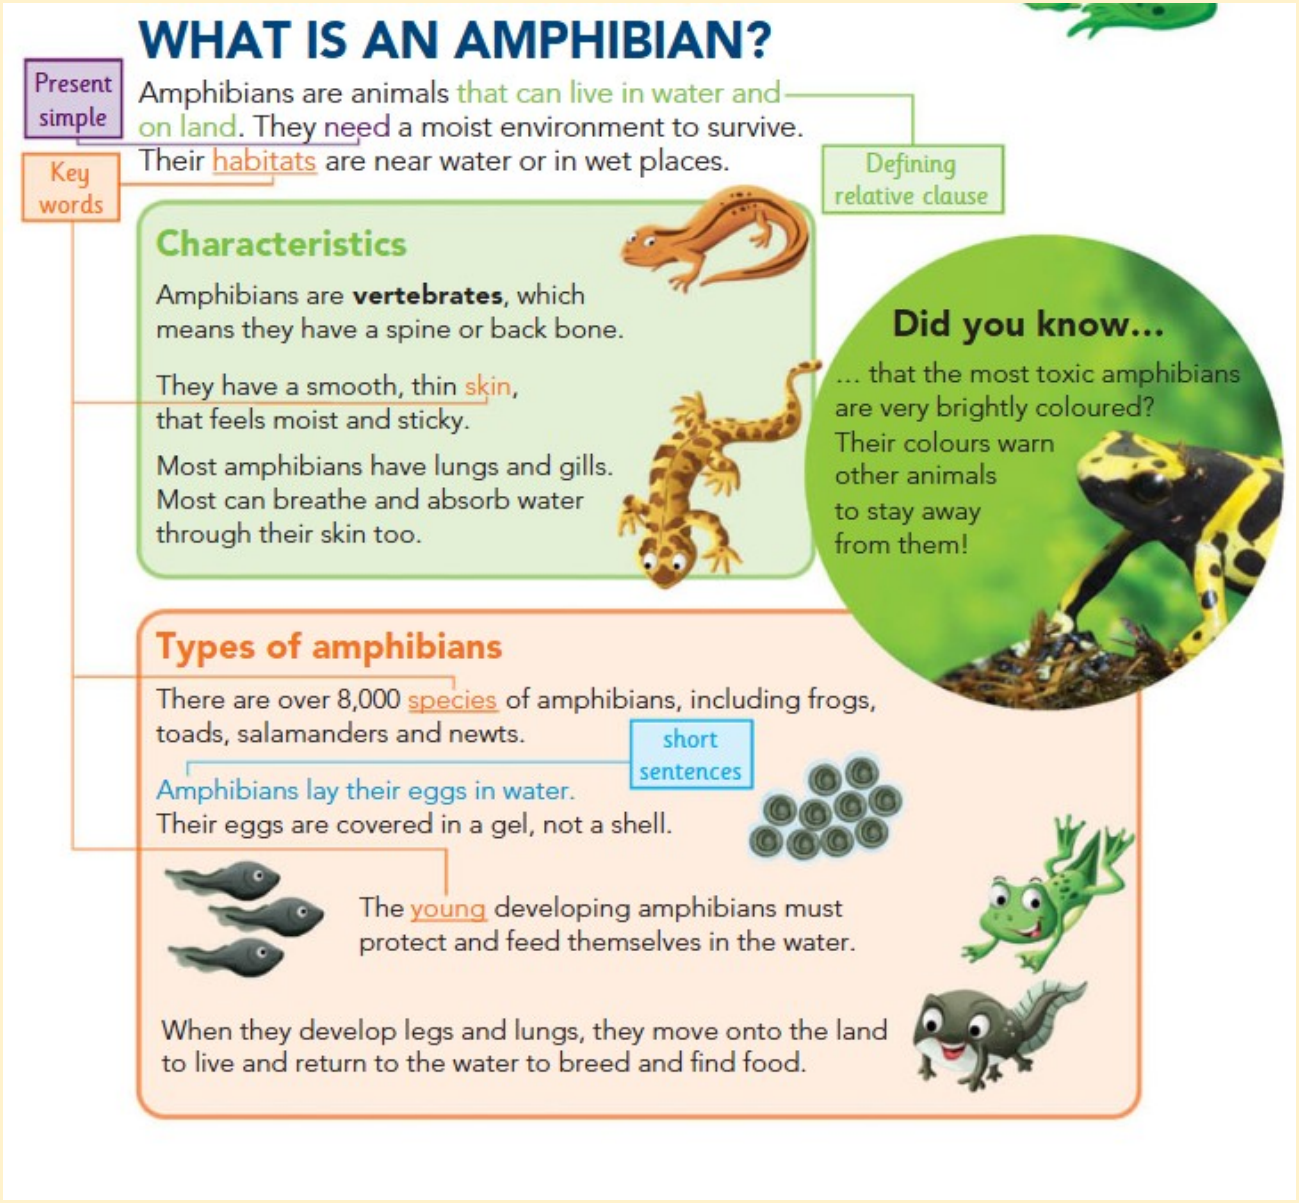

WALT: Create an infographic about an animal.

Your task

Create an infographic.

It must include:

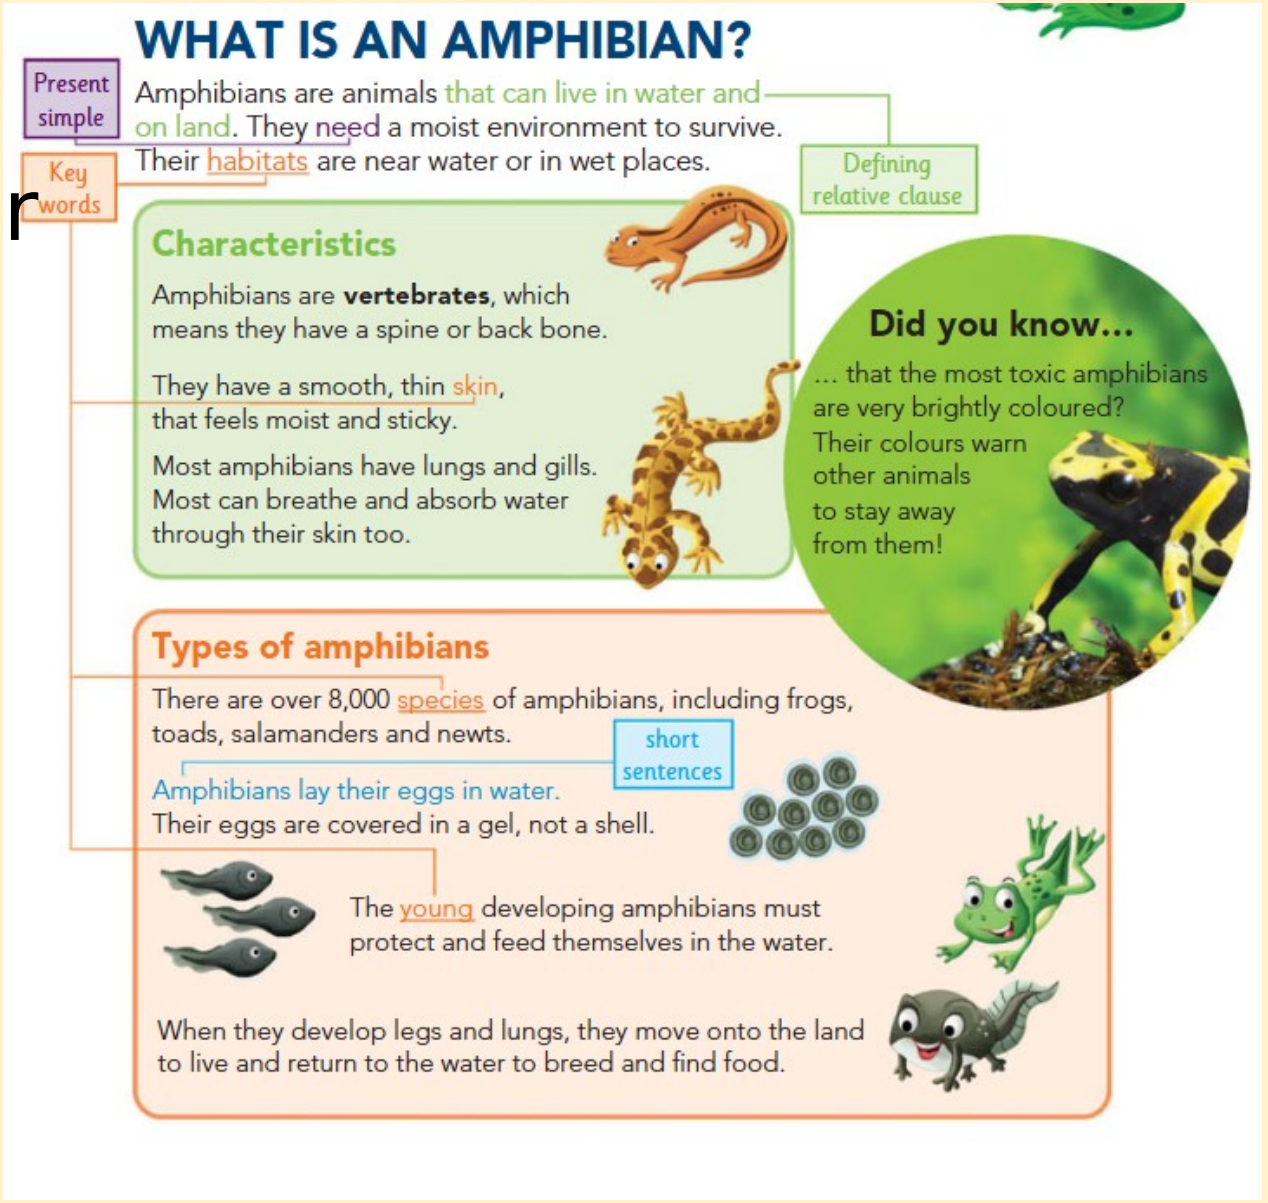

- Wh- questions
- A relative clause
- Pictures
- Subheadings

WALT: Create an infographic about an animal.

You are going to present your infographic to your partner.

Tell them what you found!

WALT: Create an infographic about an animal.

I can create an infographic about an animal.

I can write about how my animal can survive.

I can include Wh-questions and relative clauses.
