Name: _____ Class: _____ Date: _____

Unit 3 | Revision

SECTION A — USE OF ENGLISH

Part 1 | Multiple-choice grammar

Circle A, B or C.

1. A group of seabirds nests together in a large _____ near the cliffs.
   A. pod B colony C school
2. The mother eagle _____ her chicks safe during heavy rain.
   A. keeps B keep C is kept
3. The young turtle, _____ swims towards the sea, must avoid predators.
   A. whose B whom C which
4. At the rescue centre, fresh food _____ to the injured fox every morning.
   A. brings B bring C is brought
5. The keeper _____ the animal enclosure every day.
   A. clean B cleans C is cleaned
6. Several dolphins swim together in a _____.
   A pod B colony C flock
7. The bird, _____ feathers are bright blue, lives in the rainforest.
   A. which B whose C whom
8. Young seals _____ protected by their mothers.
   A. is B are C does
9. Why _____ the owl hunt at night?
   A. do B does C are
10. The eggs _____ carefully by the parent bird.
    A. protect B are protected C protects
11. Many insects _____ in warm, wet forests.
    A. lives B live C is lived
12. The frog, _____ has sticky feet, can climb leaves.
    A. whose B whom C which
13. A group of fish is called a _____.
    A. colony B school C pod
14. The female lion _____ for food with other lions.
    A. hunt B hunts C is hunted
15. The nest _____ from twigs and grass.
    A. is made B makes C make
16. The snake, _____ skin has colourful patterns, hides among leaves.
    A. which B whose C whom

Part 2 | Complete the text

Use each word once. There are two extra words.

are does is pods live which whose

Dolphins in the bay

Many dolphins (17) _____ in warm coastal waters. They often travel in groups called (18) _____. In marine reserves, the animals (19) _____ protected by rules that limit boat speeds. Researchers sometimes photograph mothers (20) _____ calves swim close beside them. Why (21) _____ a dolphin leap out of the water? Scientists are still studying this behaviour.

Extra word-box practice

is are does whose which live colony school

Sea turtles (22) _____ in tropical oceans. A beach (23) _____ is protected from visitors provides a safer place for eggs. The turtle, (24) _____ shell is hard, can protect much of its body. Why (25) _____ a hatchling move towards the sea? Some nesting beaches (26) _____ monitored by volunteers. A penguin breeding group is called a (27) _____.

Name: _____ Class: _____ Date: _____

Part 3 | Complete the conversation

Write the correct letter A–H in each gap. Two options are extra.

Maya: We need to make a poster about a forest food chain.

Noah: 28. _____

Maya: Yes, let's begin with green plants.

Noah: 29. _____

Maya: Exactly. Caterpillars eat the leaves.

Noah: 30. _____

Maya: Small birds eat the caterpillars.

Noah: 31. _____

Maya: A hawk can eat the small birds.

Noah: 32. _____

Maya: Yes, and we should show how energy moves along the chain.

Noah: 33. _____

Maya: Great! Now the poster is clear.

A. What animal eats the caterpillars?

B. Yes, arrows will help show the direction.

C. We could draw plants, insects and birds.

D. The hawk is the top predator in this example.

E. The plants are producers because they make food.

F. Do whales live in the forest?

G. Which animal could eat those birds?

Extra language challenge | Rewrite the sentences

34. Join using whose: The bird has long wings. Its nest is on the cliff.

_____

35. Join using which: The frog is poisonous. It has bright yellow skin.

_____

36. Change to passive: The keeper feeds the penguins every day.

_____

37. Change to passive: Volunteers protect the turtle eggs.

_____

SECTION B — READING COMPREHENSION

Part 1 | Notices and messages

Read each notice or message. Circle A, B or C.

38. [WILDLIFE PARK: Family tickets are half price on Saturday only.]

. When can families buy cheaper tickets?

A Every weekend B Only on Saturday C Only on Sunday

39. [BUTTERFLY HOUSE: Please do not touch the butterflies. Photographs are welcome.]

. What are visitors allowed to do?

Name: _____ Class: _____ Date: _____

A Take photographs B Hold butterflies C Feed butterflies

40. [Message from An: “Could you bring your rainforest notes tomorrow? I missed the lesson and want to check my work.”]

. Why does An want the notes?

A To copy a drawing B To give them to a teacher C To check information she missed

41. [TURTLE NESTING AREA: Keep behind the rope until the eggs have hatched.]

. What must visitors do?

A Stay outside the protected area B Walk carefully over the sand C Look for eggs under the sand

42. [SCHOOL ECO CLUB: Bring your own water bottle. We will provide gloves and bags for the clean-up.]

. What should students bring?

A Gloves B A water bottle C Rubbish bags

43. [Message from Leo: “I have finished the animal pictures. Can you add labels before we present our project?”]

. What does Leo want?

A Help writing labels B New animal pictures C Someone to present alone

Part 2 | Read the article and answer Questions 44–51

A morning with the bird survey team

by young nature volunteer, Ella Tran

Last autumn, I joined a group of volunteers counting birds at a wetland reserve. We met just after sunrise. I expected to spend the whole morning beside the large lake, but our guide led us along a narrow path to several quiet pools instead. She explained that birds often feed there before visitors arrive.

At the first pool, I heard a strange whistling call. I searched the trees but could not see the bird. Finally, another volunteer pointed to a small kingfisher sitting on a low branch. Its blue-green feathers looked almost the same colour as the leaves in the early morning light.

Later, I noticed a large shape standing among the reeds. I thought it was a piece of wood until it moved its head. It was a heron, waiting silently for fish. I wanted to walk closer, but our guide reminded us that we should observe wildlife without disturbing it. We used binoculars instead.

The most exciting moment came when we spotted several young ducks following their mother through the water. I had seen ducks many times before, but I had never noticed how quickly the ducklings could change direction together.

Before leaving, we recorded the number of birds we had seen and compared our notes. Our guide explained that regular surveys help scientists notice changes in bird populations. My feet were wet and I was tired, but I was already looking forward to joining another survey.

44. What surprised Ella at the beginning?

A. The survey started after lunch. B. The guide chose quiet pools instead of the lake. C. The volunteers had no guide.

45. Why was the kingfisher difficult to see?

Name: _____ Class: _____ Date: _____

A. Its colours blended with the leaves. B. It was swimming underwater. C. It was too far away to hear.

46. What did Ella first think the heron was?

A. A duck B. A fish C. A piece of wood

47. Why did the guide stop Ella from moving closer?

A. The path was closed. B. The group should not disturb the bird. C. The bird had already flown away.

48. What surprised Ella about the ducklings?

A. How quickly they moved together B. How loudly they called C. How far they could fly

49. Why did the group record bird numbers?

A. To decide which birds to feed B. To choose a new walking path C. To help track changes in populations

50. How did Ella feel at the end?

A. Angry about the weather B. Tired but eager to return C. Disappointed with the survey

51. What is the main purpose of this article?

A. To describe a personal wildlife experience B. To explain how to build a bird nest C. To compare every wetland in the country

Name: _____ Class: _____ Date: _____

ANSWER KEY

Grammar 1–4: 1 B colony; 2 A keeps; 3 C which; 4 C is brought.

Extra grammar 5–16: 5 B cleans; 6 A pod; 7 B whose; 8 B are; 9 B does; 10 B are protected; 11 B live; 12 C which; 13 B school; 14 B hunts; 15 A is made; 16 B whose.

Word box 17–21: 17 live; 18 pods; 19 are; 20 whose; 21 does.

Extra word box 22–27: 22 live; 23 which; 24 whose; 25 does; 26 are; 27 colony.

Conversation 28–33: 28 C; 29 E; 30 A; 31 G; 32 D; 33 B.

Rewrite examples: 34 The bird whose nest is on the cliff has long wings. 35 The frog, which has bright yellow skin, is poisonous. 36 The penguins are fed by the keeper every day. 37 The turtle eggs are protected by volunteers.

Notices 38–43: 38 B; 39 A; 40 C; 41 A; 42 B; 43 A.

Article 44–51: 44 B; 45 A; 46 C; 47 B; 48 A; 49 C; 50 B; 51 A.

Writing: Assess coverage of all four required content points, clear organisation, relevant animal vocabulary, grammar, spelling and punctuation. Accept accurate alternatives. Aim for 60–80 words per task.
