Maths

Unit 5 – 2D shapes.

12.11.2026

WALT: Identify the parts of a circle.

Homework

Maths - Workbook pages 62 - 69.

ESL - Workbook - 4.3 + 4.4

WALT: Identify the parts of a circle.

I can name the 4 keys parts of a circle.

I can label the 4 main parts of a circle correctly.

I can think of an expression to link the parts of a circle.

WALT: Identify the parts of a circle.

Retrieval Practice

Here is part of a sequence.

1.9	1.6	**1.3**	**1**	**0.7**	0.4
	2nd term				6th term

The sequence is made by subtracting a constant amount from the previous term.

Write the 8th term.
Show your working.

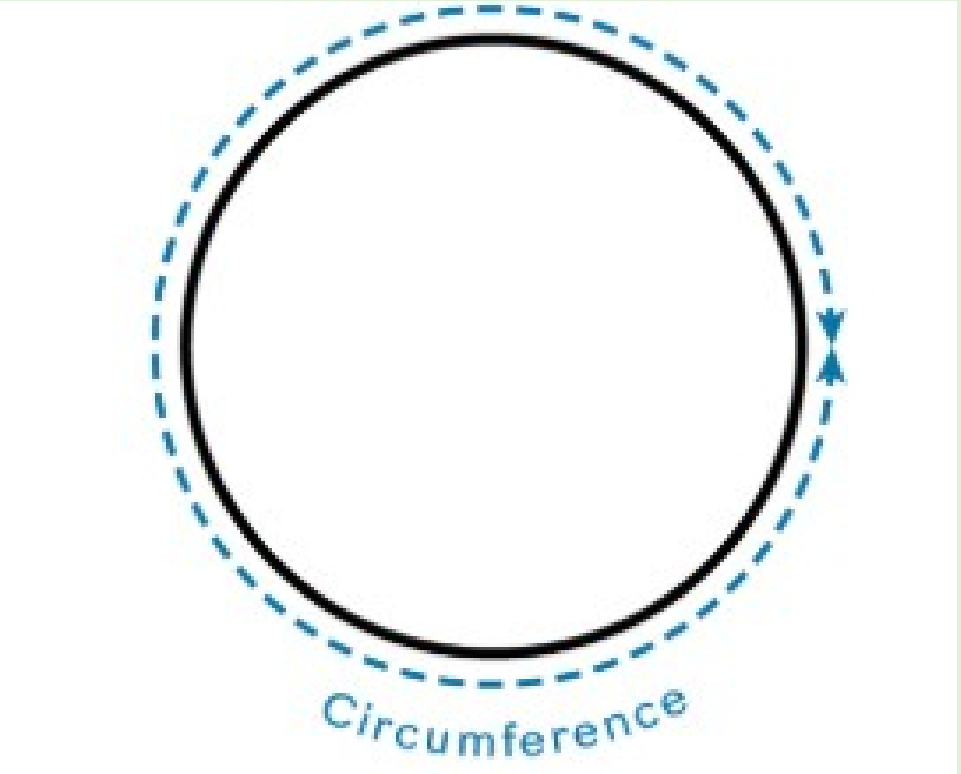

WALT: Identify the parts of a circle.

This week we are going to learn about circles.

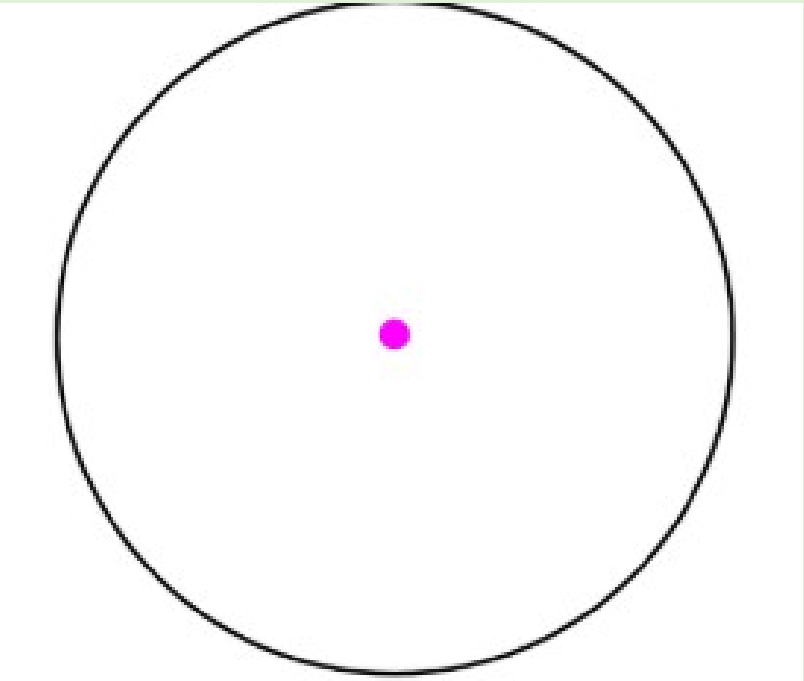

WALT: Identify the parts of a circle.

Circumference – the perimeter of a circle.

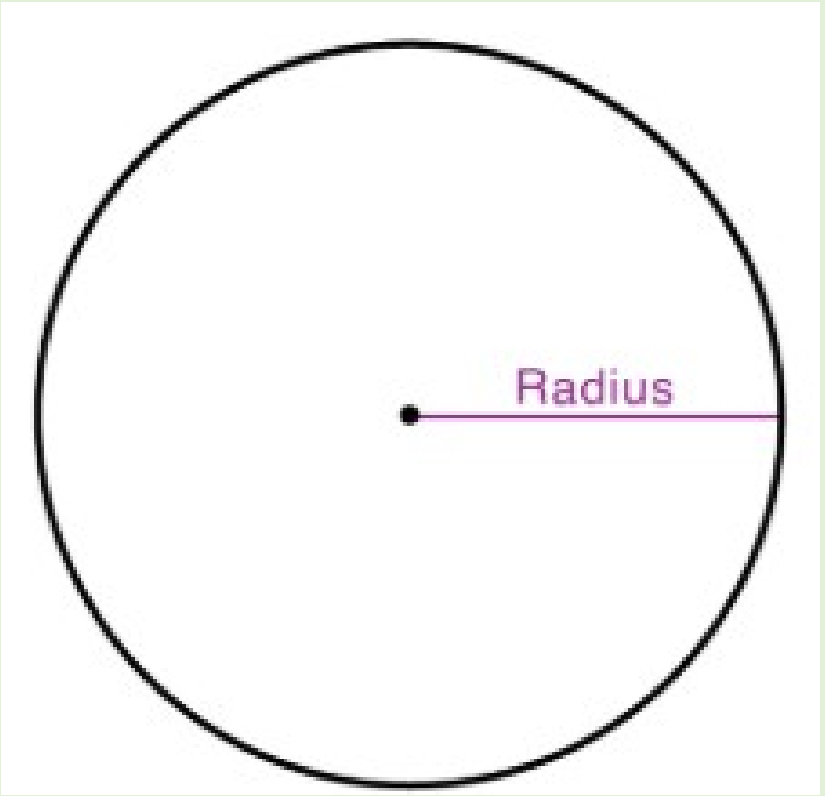

WALT: Identify the parts of a circle.

Centre – the middle of a circle.

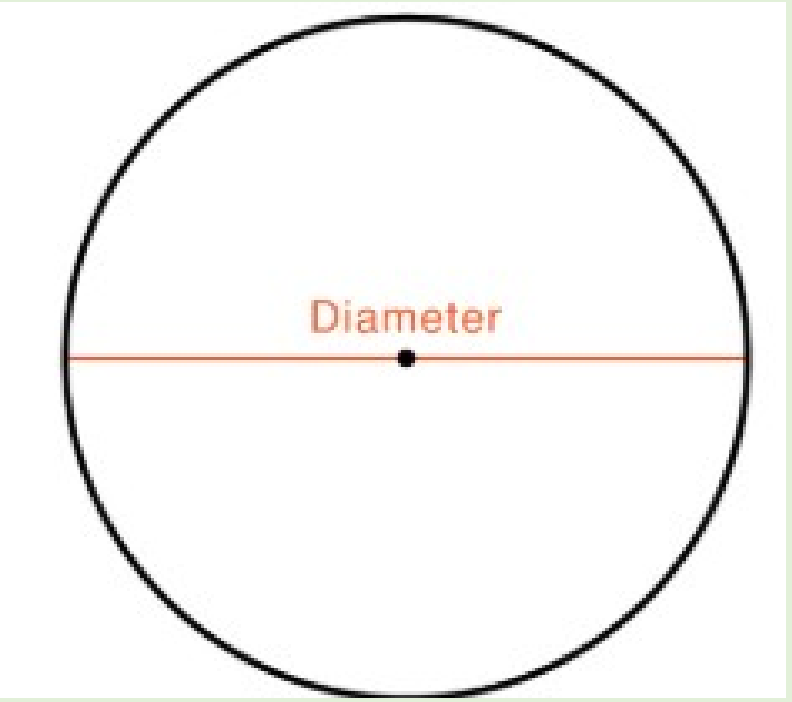

WALT: Identify the parts of a circle.

Radius -a line that joins the centre of a circle to the circumference.

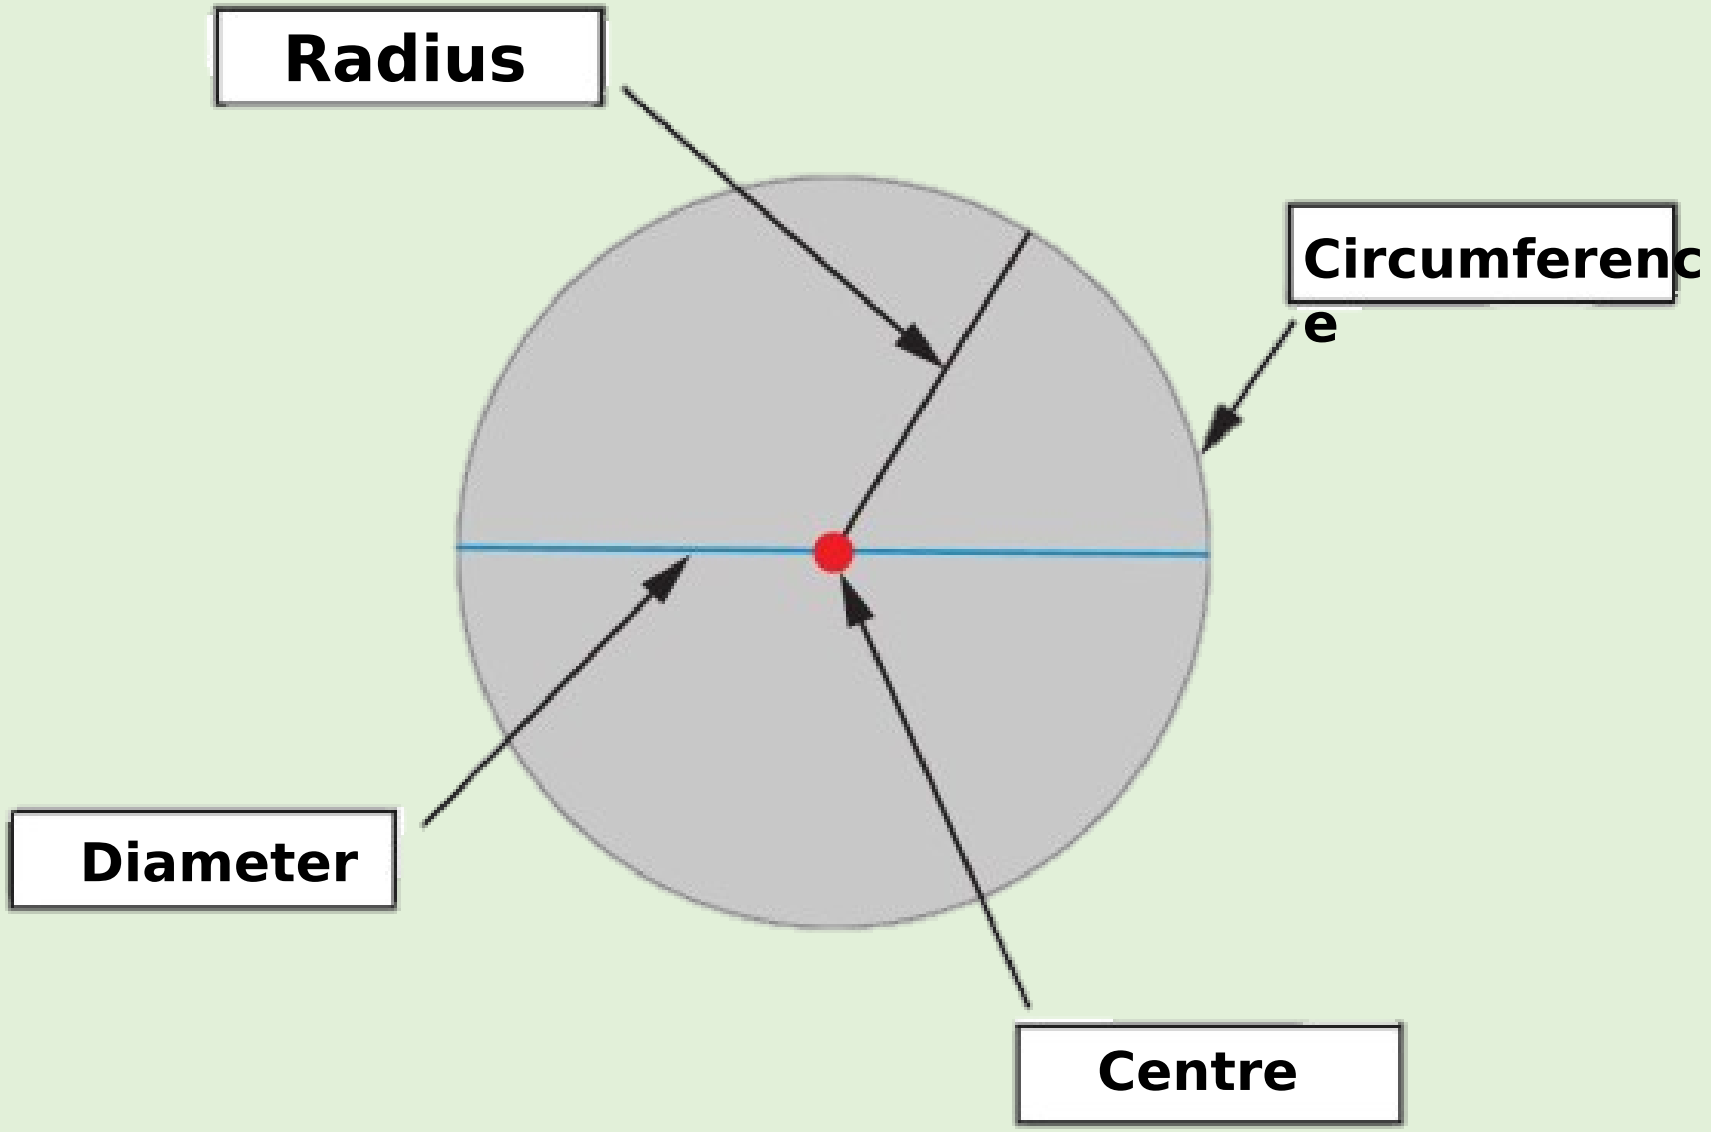

WALT: Identify the parts of a circle.

Diameter - a line that joins two points on the circumference of a circle. It must go through the centre.

WALT: Identify the parts of a circle.

WALT: Identify the parts of a circle.

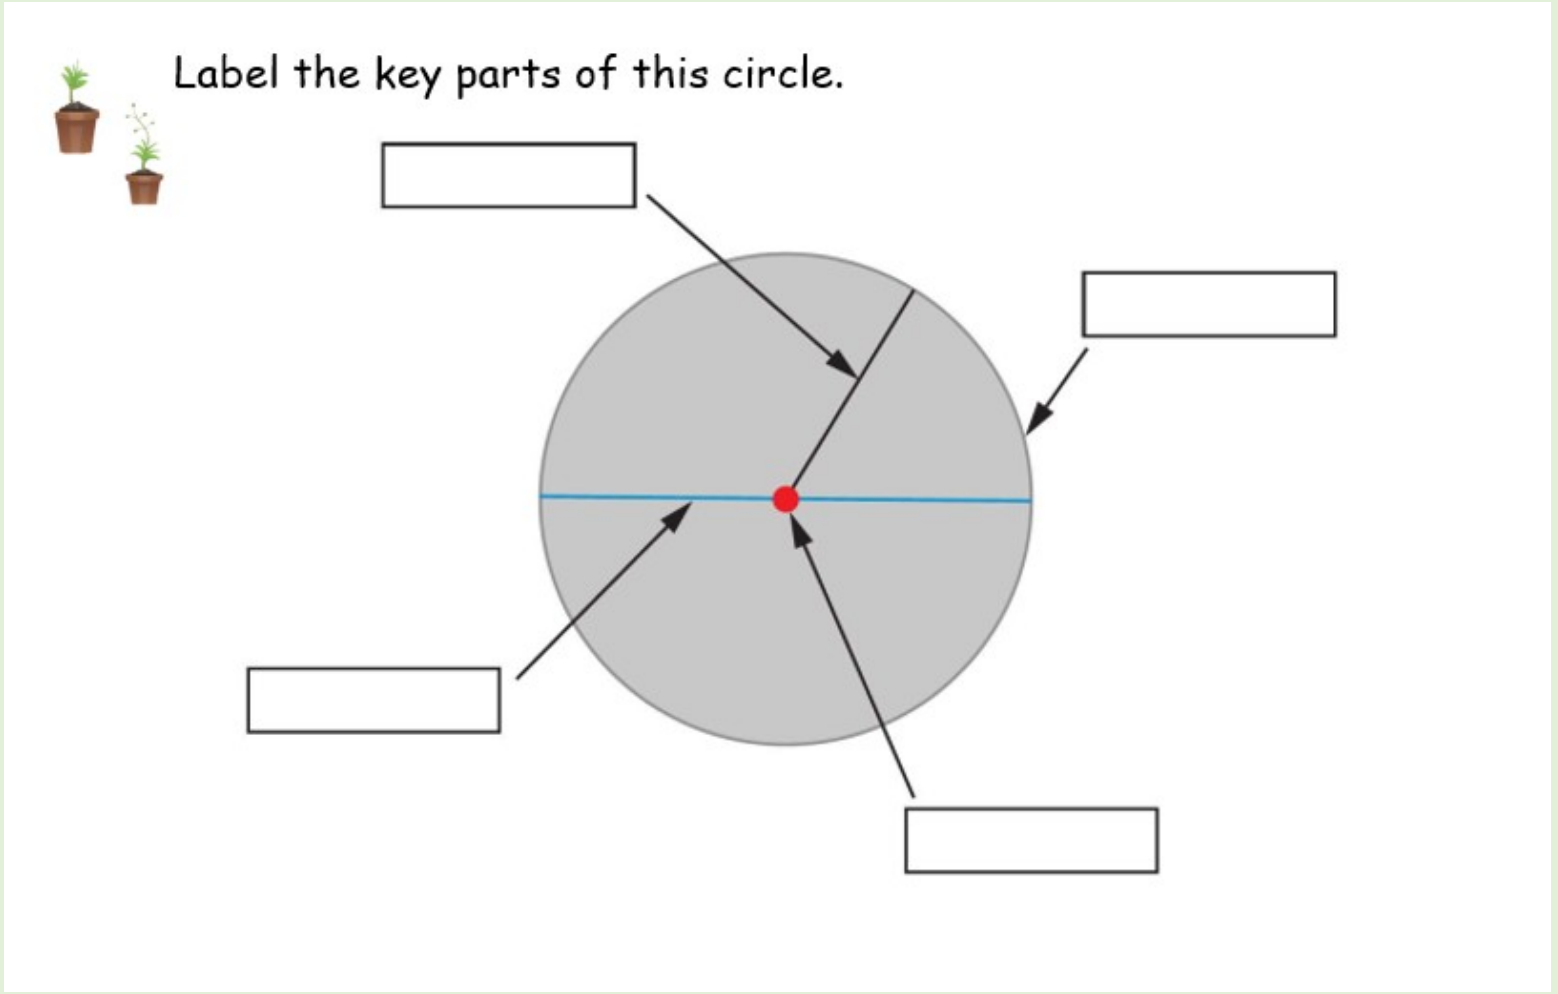

Check your understanding!

Circumference

Diameter

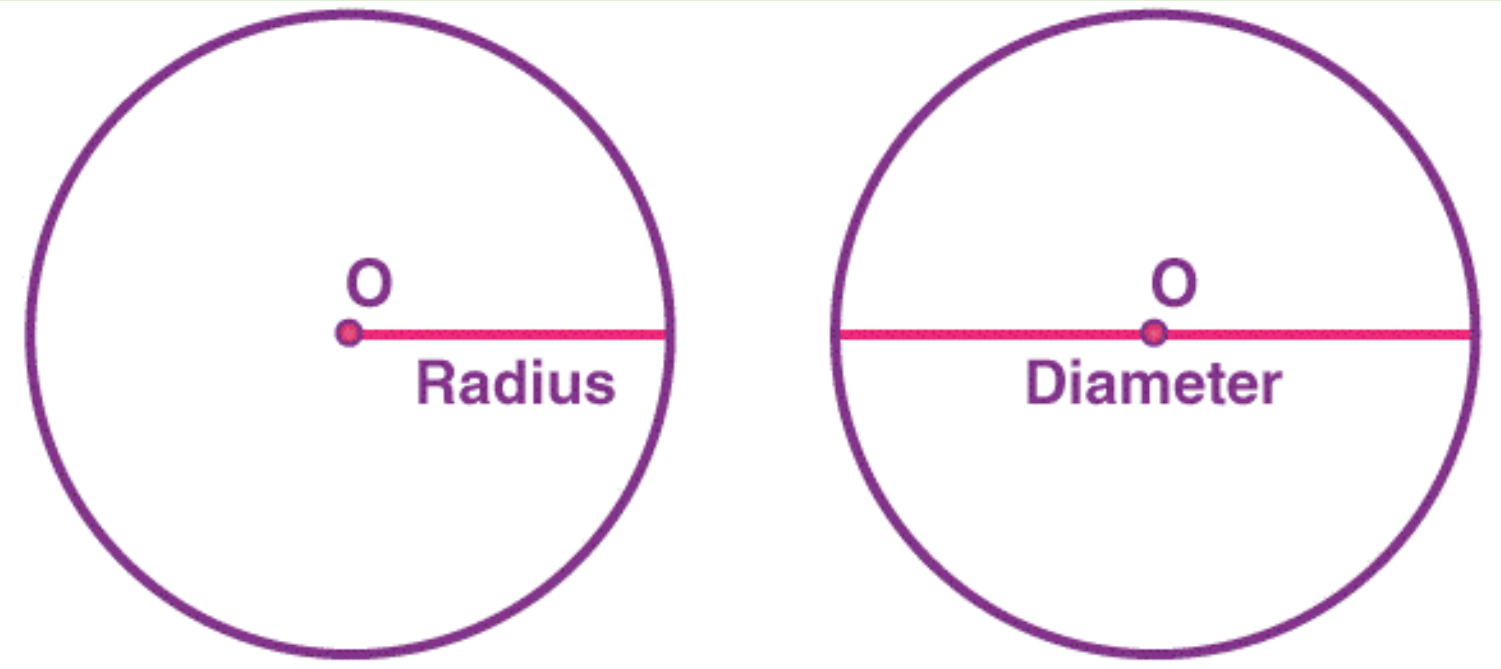

Centre

Radius

WALT: Identify the parts of a circle.

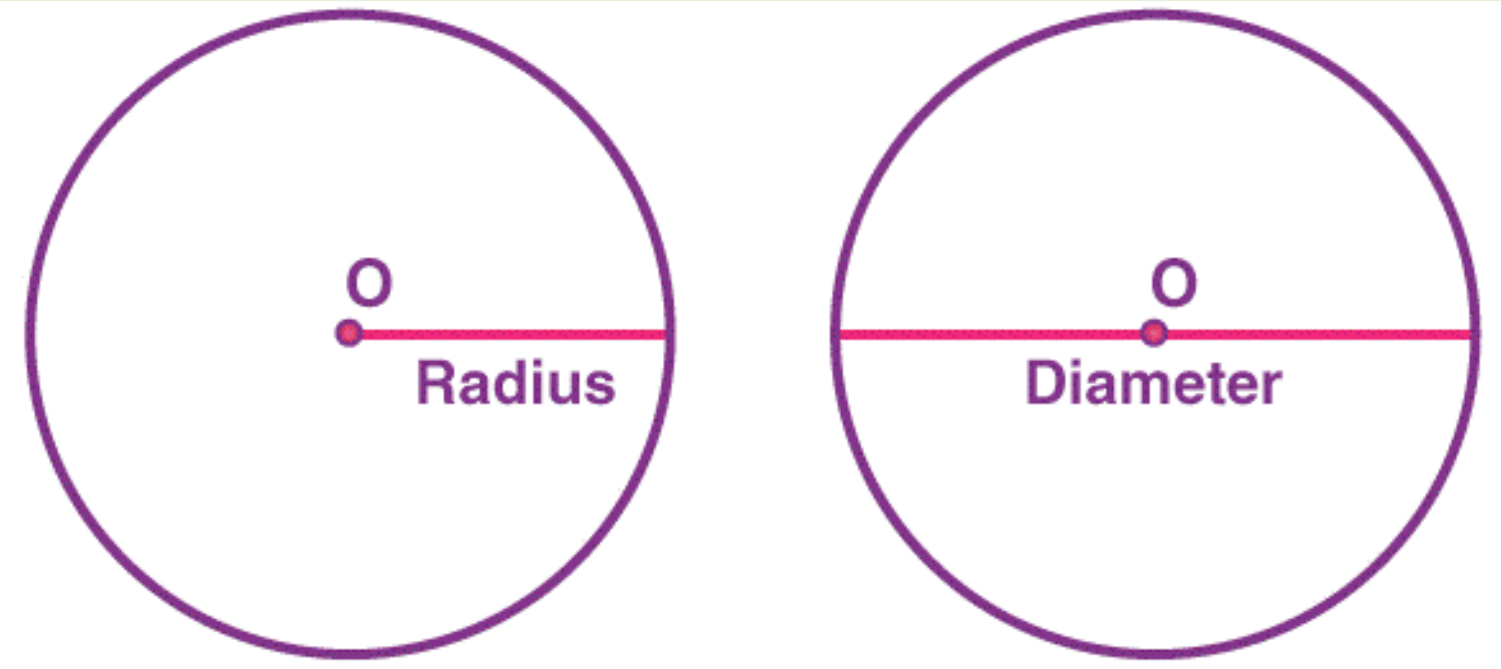

Can you think of a rule that links radius to diameter?

The diameter of a circle is always double the radius.

WALT: Identify the parts of a circle.

If we call the radius “r” and the diameter “d” can you write an expression linking radius and diameter?

d = 2r

r = d ÷ 2

WALT: Identify the parts of a circle.

I can name the 4 keys parts of a circle.

I can label the 4 main parts of a circle correctly.

I can think of an expression to link the parts of a circle.

WALT: Identify the parts of a circle.

Plenary – Today we learned all the parts of the circle we need to know in grade 5.

Do you think there might be more parts?

How could you find out about them?
