

Unit 6 - Fractions and Percentages Vocabulary

Numerator – the top number of a fraction.

Denominator – the bottom number of a fraction. It tells you how many equal parts a shape or an amount has been divided into.

Proper fraction – a fraction smaller than one whole. The numerator is smaller than the denominator. $\frac{2}{5}$

Improper fraction – a fraction where the numerator is greater than the denominator. $\frac{8}{5}$

Mixed number – a whole number and a fraction combined. $2\frac{2}{5}$

Operator – a symbol that tells us what operation is being completed.

Per cent – the number of parts out of every hundred.

Equivalent fractions – fractions that are equal in value. $\frac{1}{2} = \frac{5}{10}$

Simplify a fraction – reduce the numerator and denominator of a fraction to smaller numbers. $\frac{25}{40} \rightarrow$ divide by 5 $\rightarrow \frac{5}{8}$

Simplest form – a fraction where the numerator and denominator cannot be made any smaller to give an equivalent fraction.
