

Maths

Unit 2 - Numbers
and Sequences

04.09.2026

WALT:

6Ni.06 - Understand common multiples
and common factors.

WALT: Understand common multiples and common factors.

**I can find
common
multiples of
numbers using
a 100 square.**

**I can use a Venn
diagram to
classify numbers
and find common
multiples and
common factors.**

**I can answer
word questions
about factors
and multiples.**

WALT: Understand common multiples and common factors.

Retrieval Practice

Here are the first three terms of a sequence.
Each term is made from the sum of a pair of square numbers.

• •

2

• • • •
• • • •

8

• • • • • •
• • • • • •
• • • • • •

18

The sequence continues in the same way.

Write the 6th number in the sequence.

WALT: Understand common multiples and common factors.

Starter -

Write all the factors of 12.

Write all the multiples of 12.

Can you do it? Why / why not?

WALT: Understand common multiples and common factors.

We are going to be part of a
“mathematical orchestra”.

WALT: Understand common multiples and common factors.
I will be the conductor and count the beat.

Table 1 - Stand up whenever I say a multiple of 1.

Table 2 - Stand up whenever I say a multiple of 2.

Table 3 - Stand up whenever I say a multiple of 3.

Table 4 - Stand up whenever I say a multiple of 4.

Table 5 - Stand up whenever I say a multiple of 5.

Table 6 - Stand up whenever I say a multiple of 6.

WALT: Understand common multiples and common factors.

How many tables will stand up when I say 24?

How do you know?

What is the first number where all 6 tables will stand up? How do you know?

WALT: Understand common multiples and common factors.

The activity we have just done demonstrated common multiples and common factors.

Common Multiples – Multiples that are shared by more than one number.

For example 10 is a common multiple of both 2 and 5.

Common Factors – Factors that are shared by more than one number.

For example 10 is a common factor of both 20 and 30.

WALT: Understand common multiples and common factors.

We can use a 100 square to help us find common multiples.

Use one colour to circle all the multiples of 5.

Use a different colour to circle all the multiples of 6.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

WALT: Understand common multiples and common factors.

We can use a 100 square to help us find common multiples.

Let's find the
common multiples
of **5** and **6**.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

WALT: Understand common multiples and common factors.

Check your understanding

- 1) What are the common factors of 6 and 15?
- 2) Write a number is a common multiple of 4 and 7?
- 3) Ms. Colette and Ms. Anh both enjoy playing basketball. If they both to basketball training on the 1st of June and Ms. Colette goes once every **3 days** and Ms. Anh goes once every **4 days**. How many times will they play basketball on the same day in June in total?

WALT: Understand common multiples and common factors.

Check your understanding

1) What are the common factors of 6 and 15?

1, 3

2) Write a number is a common multiple of 4 and 7?

28, 56, 84, 112, 140...

WALT: Understand common multiples and common factors.

3) Ms. Colette and Ms. Anh both enjoy playing basketball. If they both go to basketball training on the 1st of June and Ms. Colette goes once every **3 days** and Ms. Anh goes once every **4 days**. How many times will they play basketball on the same day in June in total?

WALT: Understand common multiples and common factors.

 **Ms. Colette**

 **Ms. Anh**

JUNE 2025						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	1	2	3	4	5

WALT: Understand common multiples and common factors.

3) Ms. Colette and Ms. Anh both enjoy playing basketball. If they both to basketball training on the 1st of June and Ms. Colette goes once every **3 days** and Ms. Anh goes once every **4 days**. How many times will they play basketball on the same day in June in total?

3 times

WALT: Understand common multiples and common factors.

 **Ms. Colette**

 **Ms. Anh**

JUNE 2025						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
  1	2	3	 4	 5	6	 7
8	 9	 10	11	12	  13	14
15	 16	 17	18	 19	20	 21
 22	23	24	  25	26	27	 28
 29	30	1	2	3	4	5

WALT: Understand common multiples and common factors.

Use your 100 grid to find the common multiples of these numbers up to 100.

5 and 7	
6 and 8	
4 and 9	

a) A baker has two types of cookies: chocolate chip and oatmeal raisin. Chocolate chip cookies are baked every 12 minutes, while oatmeal raisin cookies are baked every 18 minutes. If both types of cookies are baked at the same time at 8:00 AM, when will they be baked at the same time again?

b) A teacher wants to divide her class into equal groups for a group project. The class has 28 girls and 20 boys. What is the largest number of groups she can make so that each group has the same number of girls and boys?

c) Write your own word question about common multiples and common factors.

Complete the two Venn Diagrams below and complete the sentences.

a)

The common factors of 36 and 24 are _____.

b)

Use the numbers in the box to complete the Venn diagram.

6, 21, 28, 32, 35, 42, 63

The common multiples of 3 and 7 are _____.

WALT: Understand common multiples and common factors.

Use your 100 grid to find the common multiples of these numbers up to 100.

5 and 7	35, 70
6 and 8	24, 48, 72, 96
4 and 9	36, 72

WALT: Understand common multiples and common factors.

Complete the two Venn Diagrams below and complete the sentences.

a)

The common factors of 36 and 24 are 1, 2, 3, 4, 6, 12.

WALT: Understand common multiples and common factors.

b)

Use the numbers in the box to complete the Venn diagram.

6, 21, 28, 32, 35, 42, 63

32

The common multiples of 3 and 7 are 21, 42, 63.

WALT: Understand common multiples and common factors.

a) A baker has two types of cookies: chocolate chip and oatmeal raisin. Chocolate chip cookies are baked every 12 minutes, while oatmeal raisin cookies are baked every 18 minutes. If both types of cookies are baked at the same time at 8:00 AM, when will they be baked at the same time again?

**8:36
am**

b) A teacher wants to divide her class into equal groups for a group project. The class has 28 girls and 20 boys. What is the largest number of groups she can make so that each group has the same number of girls and boys?

4

WALT: Understand common multiples and common factors.

**I can find
common
multiples of
numbers using
a number
square.**

**I can use a Venn
diagram to
classify numbers
and find common
multiples and
common factors.**

**I can answer
word questions
about factors
and multiples.**

WALT: Understand common multiples and common factors.

Plenary

Look what I can do!

- ☐ I can count on and back using fractions and decimals.
- ☐ I can find and use the position-to-term rule in a sequence.

Look what I can do!

- ☐ I can work out the square number in any position, for example the ninth square number is $9 \times 9 = 81$.
- ☐ I can use the notation 2 to represent squared.
- ☐ I can work out the cube of numbers up to 5, for example $5^3 = 5 \times 5 \times 5$ or $5^2 \times 5$ which is 125.

Look what I can do!

- ☐ I can find common multiples.
- ☐ I can find common factors.
